Welcome to our Designer Collection technical brochure.

Helping your customers to choose the perfect Vitra bathroom is crucial. This technical brochure, to support our Designer Collection consumer brochure will assist you, by putting vital information at your fingertips.

Based on recent market research, we've brought together all the key technical elements and essential details for each range in this brochure: code, price, cut-outs and technical drawings, complete measurements, compatible products and additional information. And to make life easier, we've colour coded the different product ranges and categories so you'll have no trouble navigating your way through and recommending the right Vitra products to your customers.

This technical brochure complements the customers' Designer Collection brochure, brimming with inspiring design ideas so they can create a bathroom to match their lifestyle. Providing only the basic technical information in the consumer brochure will encourage the customer to seek more guidance from you.

We have also created a section dedicated to the shower toilet category; this includes the new V-Care Prime and the full range of Aquacare toilets.

To keep things simple, we've used icons throughout to identify features. You'll find a clear quick reference for these at the beginning of this brochure along with a useful matrix for furniture finishes and a dedicated section about all our innovation and product development.

Hopefully, having all this information in one easy-to-navigate brochure will make it easy to recommend the Vitra ranges (starting from page 11) to your customers and help them to design their new bathroom with confidence.

Icon guide

Sanitaryware code identification

- A

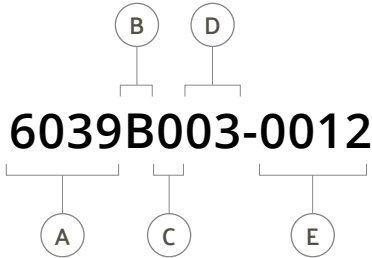

Product code
The first part of the code defines the model of the product
- B

Packaging specification code
B: In a box bearing VitrA logo
L: Loose product; without box
- C

Special application code
0: VitrA Hygiene
4: VitrA Clean + VitrA Hygiene
- D

Colour code
For example
01: Matt White
03: White
20: Matt Taupe
70: Black
83: Matt Black
- E

Technical specification code
Shows the technical features of the product. For instance the number of tap holes or bidet features.

Features

- Water-saving WC**
WCs marked with this symbol have a special bowl structure and are specifically designed to flush with both lower (2.5/4 litre) and typical (3/6 litre) water volumes.

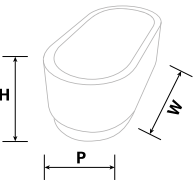

By using less water, these water saving WCs benefit you and the environment. All VitrA standard height wall-hung frames come with dual flush function as standard in both 2.5/4 litre and 3/6 litre options.
- Comfort height WC**
These WC pans are taller than regular pans for added comfort and ease of use.
- Fischer installation system**
A simple, elegant installation system for use with wall-hung WCs. The fixings are hidden from sight by the use of internal ABS sleeves, creating a clean, smooth design.
- Accessible**
These products are wheelchair accessible and provide enhanced convenience in the bathroom.
- Water Regulations Advisory Scheme**
Water Regulations Advisory Scheme Contributing to the protection of public health by preventing contamination of public water supplies and encouraging the efficient use of water by promoting and facilitating compliance with the Water Supply (Water Fittings) Regulations and Scottish Byelaws.
- VitrA Hygiene**
Coats all VitrA ceramicware and inhibits the growth of harmful bacteria by **99.9%**
- VitrA Clean**
Limescale is persistent in most bathrooms. Washbasins, WC pans and bidets are coated with VitrA Clean technology. No harsh chemical cleaning agents are needed to keep them beautifully stain-free for years.
- Quick release WC seat**
The screw-free fitting of the Quick Release VitrA WC Seat makes it easy to remove and refit after cleaning.
- Touch free**
Controlled by a built-in sensor, our touch free technology ensures increased hygiene in the bathroom.
- Rim-ex**
Offering effortless cleaning and innovative, hygienic design. VitrA's rimless WC pan eliminates the areas where germs gather and multiply, giving a superior level of hygiene.

Product position

VitrA innovation

We have listed some of the extra special ways VitrA invests in great product design to make the bathroom a safer, cleaner and better designed space.

VitrA Hygiene coating comes as standard

A unique glazing process developed by VitrA that prevents germs from multiplying. The VitrA Hygiene glaze coats all external and internal surfaces before firing in the kiln in a process that ensures lifetime VitrA Hygiene protection. VitrA Hygiene is applied to all VitrA products as standard.

Rim-ex WC pans

Rim-ex harnesses the latest in toilet bowl design. With a rimless, smooth internal pan that eliminates places where germs and dirt can accumulate, the toilet stays cleaner and actively resists dirt build-up.

Tests prove Rim-ex is **95%** more hygienic than standard toilet pans* and it is much easier to clean – as there are no ledges you have complete visibility of the bowl. The unique design of the pan incorporates a water diverter to direct the flush around the bowl, which is easily removed for cleaning.

* Tests undertaken by the Akdeniz University, Turkey, show VitrA Rim-ex toilet pans are easier to clean and **95%** more hygienic compared to standard toilet pans.

Shower toilets for that just showered feeling

Our latest generation V-Care Smart Toilets (see page 298), combine the functionality of a toilet with the personal hygiene benefits of a bidet, fully customisable and remote-controlled to create the ultimate bathroom experience. The combination of being wall-hung and having a rimless Rim-ex bowl makes the toilet hygienic and easy to keep clean.

VitrA Aquacare is a simple mechanical bidet (see page 300), with the uniquely designed, integrated air-breaker protects the household supply of drinking water from contamination, in accordance with the DIN EN1717 regulations, as well as the protection of a DVGW approval. Sold as a complete set, installing an Aquacare toilet is fast and simple. Aquacare is part of the Sento and M-Line collections and comes with a choice of either an integrated thermostatic mixer or a non thermostatic wall-mounted mixer.

Smart Panel

As the digital home evolves, VitrA has combined smart technology with water-saving design in a modern and elegant flush plate that is compatible with VitrA 742 and 748 frames (see page 213).

V-Box new slimmer design for easy installation

Introducing a new concealed part design for our shower systems. This new V-Box can be fitted to a minimum depth of 77mm, which is standard in the UK and the unit is compatible with our thermostatic shower mixers on page 232.

Striking finishes

Physical Vapour Deposition (PVD) is a state-of-the-art manufacturing process in which metal powders are vaporised and deposited onto a surface. The metallic coating presents a striking finish and remains corrosion and scratch-resistant. Available on our Origin brassware (see page 172) and the Water Jewels basins (see page 134).

VitrA Fresh for a cleaner WC

VitrA Fresh is available in our M-Line series and features a built-in tank that dispenses detergent** with every flush, helping to keep the bathroom smelling fresh, the pan clean and protects against the build-up of bacteria. The removable lid allows for easy refill and cleaning.

VitrA Clean – special surface for extra hygiene benefits

VitrA Clean is a surface finish that makes VitrA sanitaryware products incredibly easy to clean. This special glazing process increases surface tension so the water flows easily from the surface. All that's needed to keep the basins clean is a wipe with a damp cloth and the use of a mild detergent, making cleaning easier and helping to keep your bathroom looking its best. VitrA Clean comes as standard on the following products:

- Outline basins, see page 138
- Memoria basins and WC, see page 88
- Voyage basins, see page 36
- Equal basins and WC, see page 52
- Frame basins, see page 96

VitrA Infinit – an alternative to ceramic

A material manufactured by using a combination of natural stone powder and polyester resin, mineral cast produces a beautiful finish which is warm to the touch and easy to clean. It can also be used to create basins in a wide range of shapes and sizes. Mineral cast is a hard-wearing material with the added benefit of being invisibly repairable in the unlikely event of the basin becoming damaged. VitrA Infinit is a feature in Memoria Infinit, see page 92 and M-Line Infinit, see page 106.

** The liquid detergent dispenser is safe to use with most commercially available non-abrasive toilet cleaning liquids which include hypochlorous cleaning agents and bleach of up to 12.5PH.

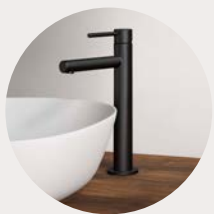

Reasons to recommend Vitra

Extensive choice of products

Offering ceramic sanitary ware, furniture, smart products, showers, taps, bathtubs and accessories.

Finishing touches from the same range

Origin is available in four colour finishes; Chrome, Brushed Nickel, Matt Black and Copper allowing you to style your whole bathroom using one range.

Commitment to Blue Life

By choosing a Vitra product you are contributing to saving the world's natural resources.

European Water Label supporter

With sustainability at our core, the majority of our products fall under the best water consumption band (Class A, using 5 litres or less of water).

Vitra Clean

A special glazing process that increases surface tension so the water flows easily from the surface.

Vitra Hygiene

A unique glazing process applied as standard to all our ceramic products, developed by Vitra that prevents germs from multiplying.

Rim-ex

A rimless, smooth pan that eliminates areas for germs and dirt to accumulate. The toilet stays cleaner for longer and actively resists dirt build-up.

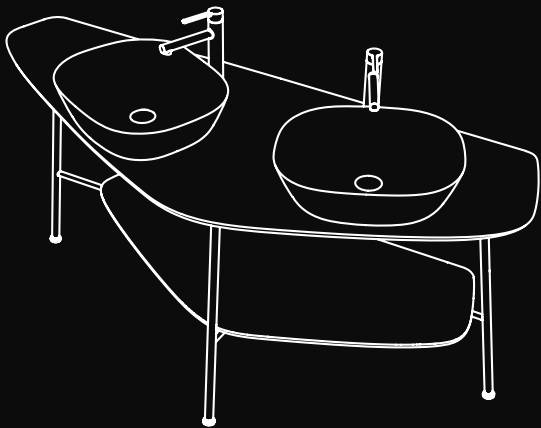

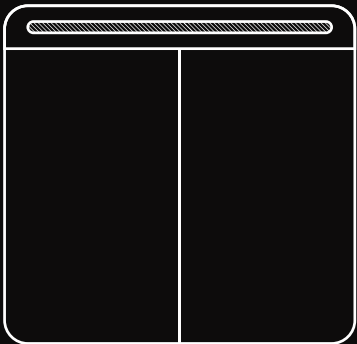

Shower toilets

Vitra offers two styles of shower toilet: V-Care or Aquacare to meet all your shower toilet needs.

Designer ranges

Created in collaboration with world-renowned designers, our exclusive ranges showcase the very best in bathroom design. In this brochure you will find full product listings and complete technical specifications for all of our designer bathroom ranges, taps, showering solutions and accessories.

Liquid

The Liquid collection evokes a sense of permanence with soft and rounded forms in durable white porcelain. The bones of this collection are the all-white ceramics, offset with signature chunky brassware (see page 158) in either gloss black or classic chrome finish – a quintessential and timeless core aesthetic for the bathroom. The range also includes distinctive wall tiles, available in five designs and with colour options of White, Black, Grey, Sage Green and Ecru.

by **Claudio Bellini**

Equal

The strength of this range comes from its simplicity and versatility.

Elm or Patterned Black Oak furniture can be combined with basins available from 40cm to 130cm. Furniture units fit under the washbasins making it perfect for smaller spaces. Matching towel holders, shelving and mirrors provide a 3-in-1 solution.

Equal balances crisp minimalism with great functionality.

Origin

Created by Design Studio Vitra, grace shapes the Origin Collection's minimalism. Origin is a meeting point for mixers, accessories, shower systems and counter solutions. Subtle lines, sleek designs with colour alternatives create a wealth of choice leading to a truly customisable bathroom environment.

The Calacatta Silk Neolith worktop is made of hard-wearing, man-made stone, a fusion of ceramic and porcelain, combined with a beautiful mix of quartz, glass and silica. The durable surface is liquid-resistant with low water absorption, making it ideal for the bathroom.

Frame

Frame contrasts rustic wooden furniture with smooth ceramics. The louvre effect provide a contrast to the ceramic. The ceramic countertop or inset basins are available in various colours including matt black, whilst monoblock and vanity basins are available in two colours. Washbasin units include the washbasin and start from 60cm up to 100cm, with the colours perfectly complementing each other.

Sento

Sento brings scandinavian style into the bathroom. This furniture range is designed to complement the popular Sento WC pan. Four matt furniture finishes, including the new Matt Light Grey option and five basin sizes are available, including a compact cloakroom option. With sensor LED lighting underneath the washbasin units and a leg set option, this range provides a new take on bathroom furniture.

Water Jewels

The Water Jewels collection offers something special for those with a contemporary taste. The striking colour finishes all come with a PVD coating (see page 9), ensuring the basins remain corrosion and scratch-resistant. Balancing simplistic design with intriguing textures and effects, the Water Jewels range brings drama in a way that is practical and durable, whilst giving your space an original identity.

Shower systems

Refresh and revitalise your bathroom with our range of stylish showers. Choose from a wide range of designs with thermostatic or manual options, exposed shower valves, hand showers (with and without slide rails), beautiful overhead shower heads and practical shower columns all with the design credentials synonymous with the VitrA brand.

Liquid shower systems	267

Choosing your shower system

Choosing the right shower system is one of the most important aspects of bathroom design, especially given the wide variety of shower valves, handshowers and showerhead styles to choose from.

What is a shower valve?

The shower valve controls the flow of water, similar to the tap on a basin. There are two key considerations.

Firstly, shower valves can be either concealed behind the wall or exposed, typically a horizontal bar sits outside of the wall and contains all of the working parts.

Concealed shower valves

Locating the shower valve behind the wall creates a contemporary look, allows for more space under the showerhead and makes cleaning easy because the only visible part of a concealed shower valve is the control plate. For increased flexibility the concealed valves can also be placed on a wall away from the outlet (bathtub, handshower or showerhead) they are controlling. For instance the valve could be installed at the entrance to the shower on one wall, but the shower kit (slide rail, fixed head etc.) can be positioned within the shower enclosure on the opposite side.

Exposed shower valves

Unlike a concealed shower valve where the working parts are out of sight behind the wall, an exposed shower valve is ideal if you have solid brick wall that cannot accommodate a concealed shower valve or if you are looking for a quick, easy to fit solution.

The second consideration is whether you want the shower water temperature to be regulated. Thermostatic shower valves are designed to prevent fluctuations in the temperature of the water. This is an important safety consideration where extremes in water temperature can be dangerous.

Standard or manual shower valves are non thermostatic and do not regulate the water temperature, this means if a tap is turned on elsewhere in the property the water from the shower may run too hot or too cold.

VitrA offers a choice of concealed shower valves:

V-Box Thermostatic valve options only, see page 232

Aquaheat Thermostatic only, see page 256

Minibox Standard (manual) valve only, see page 238

Introducing V-Box

V-Box, by VitrA, is the new generation of concealed shower valve enabling 3 water outlets (bathtub, handshower or showerhead). V-Box can be trimmed to fit a 77mm wall depth which is standard in the UK and is compatible with our thermostatic shower mixers listed on page 231.

For the visible (exposed) part of the V-Box shower valve there is a choice of 3 styles; each with a full range of matching basin and bath fillers.

Water outlet options

1-way:

Shower mixer with adjustable water temperature control for either handshower or showerhead.

2-way:

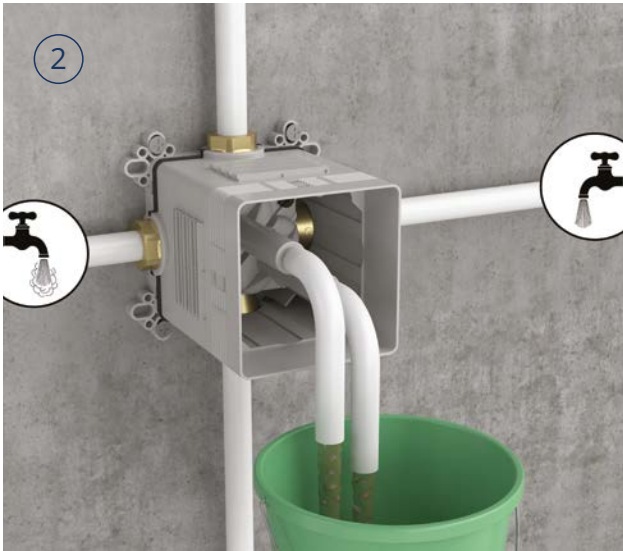

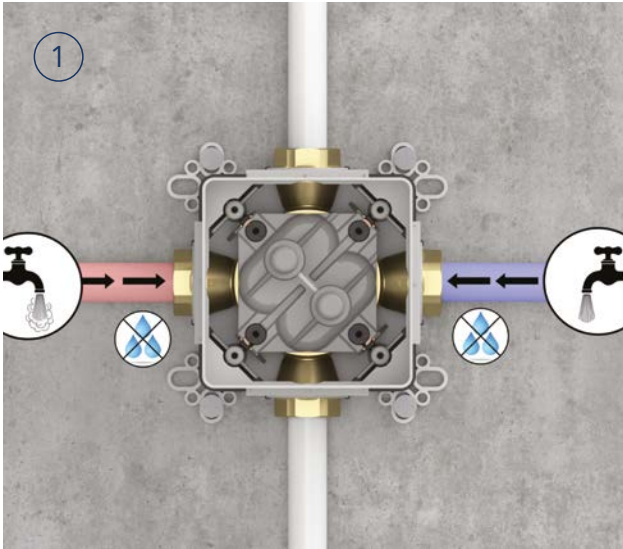

Water can be diverted to two of the following options: handshower, showerhead or to the bath. Water temperature is adjusted using one controller and the hot and cold water feed separately into the concealed valve.

3-way:

Using a diverter, the water can be directed to either the handshower, showerhead or to the bath.

Diverters enable the flow of water to be switched from one outlet to another for example to the handshower or showerhead.

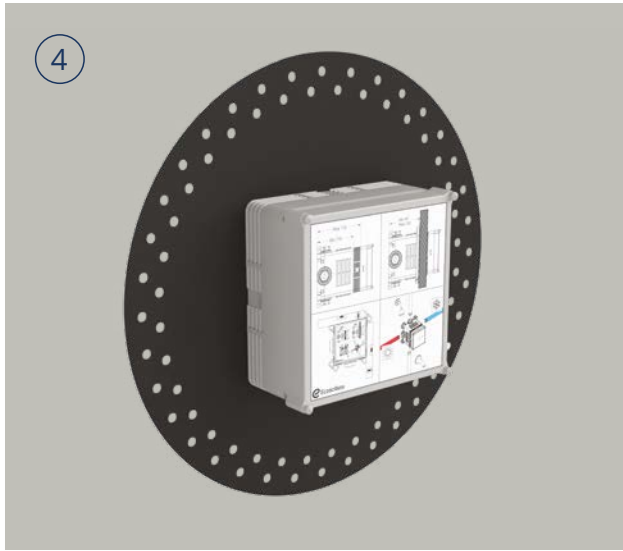

V-Box installation

- 1

Impermeability test
The water inlet pipes are fitted as shown above. Ensure the V-Box is mounted correctly and tightly to prevent leaks. There are also multiple fixing points.
- 2

Cleaning
After connecting the water feeds the special V-Box design also allows for any debris that may have accumulated from the installation process to be flushed out.

- 3

Gypsum plate wall mount
Once the water inlet pipes are connected and cleaned, the box is fitted to the wall using the multiple fixing points. Special design enables easy mounting on gypsum plate walls.
- 4

Humidity protection
To further protect the mechanism from humidity within the bathroom environment an insulating mattress is fitted. Additional sealing cuff protects the wall from humidity. After tiling is completed, the front of the box is trimmed to the correct depth and the appropriate plate can be fitted.

Choosing the right shower system with V-Box

Whether you are looking for a square or round contemporary design, there is a range suitable for any bathroom setting.

After the tiling is completed the front of the box is trimmed to the correct depth and the appropriate brassware is then fitted.

V-Box can be used with one, two or three-way outlets. Within the compatible ranges there are bath mixers and thermostatic bath/shower mixers and diverters. V-Box can be used with Root, Minimax S, Origin, Suit, and Aquacontrol exposed parts, providing choice for consumers. All exposed parts, including the handles are made of metal.

Advanced technology in the bathroom

Our latest generation of V-Care smart toilets combine smart technology with the functionality of a toilet with the personal hygiene benefits of a bidet. Our Aquacare shower toilet benefits from an integrated and mechanically operated bidet function, as well as complete ease of installation, and our flush plates offer a modern alternative to a traditional handle or lever-based flushing mechanism. They release exactly the right quantity of water, helping to monitor and conserve usage in one simple action.

Our frame systems are crucial to any modern bathroom, supporting and holding wall-hung toilets firmly in place. Frames are available in standard and reduced height, to give the freedom to create a stunning room without the need for expensive structural building work.

Touchless basin mixers	294
Shower toilets	298
Flush plates	306
Smart Panel	312
Frames and concealed cisterns	314

Convenient to use and beautiful to look at, these touchless basin mixers are activated by movement in front of an infrared sensor. This eliminates the need to touch the tap and therefore reduces the possibility of transfer of germs and bacteria.

Convenient to use and beautiful to look at, these touchless basin mixers are activated by movement in front of an infrared sensor. This eliminates the need to touch the tap and therefore reduces the possibility of transfer of germs and bacteria.

V-Care

Our latest generation of V-Care shower toilets combine smart technology with the personal hygiene benefits of a bidet.

There are three options to choose from, all featuring Rim-ex technology:

V-Care Prime

The Prime model raises the standard in terms of features and for the ultimate convenience there is a wall-hung option and a floor-standing version perfect for a retrofit solution. The stylish design complements any bathroom style and the sensor light provides ambient light within the bathroom, perfect for night time visits to the bathroom. There is a full range of cleaning options, including a gentle front cleaning function for women. Heated seat, variable wash settings and drying options are included for the ultimate personalised washing experience.

V-Care Comfort

The mid-range option, with the female and male wash function is perfect for families. Auto open and close seat is included as well as variable washing and drying options. Air deodorising is also included.

V-Care Essential

Entry level option but still with plenty of features to meet the cleaning needs of most people. If you don't want the drying option this is the choice for you.

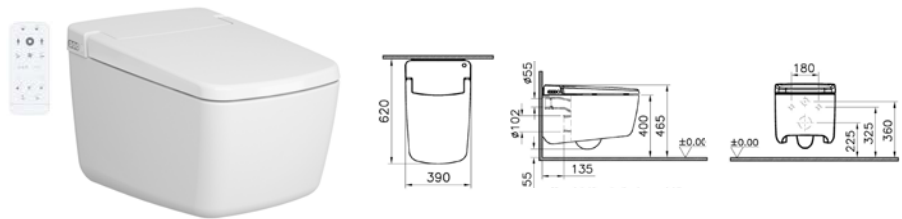

All the V-Care WCs are controlled using a stylish remote control and Vitra Prime can also be used using the app, so the wash experience can be pre programmed.

Aquacare shower toilet

Developed by the Vitra Design and Innovation Team, Aquacare is a bidet and toilet in one, offering a refreshing, clean and hygienic bathroom experience. No electrical connections are required as the water is controlled via standard plumbing methods.

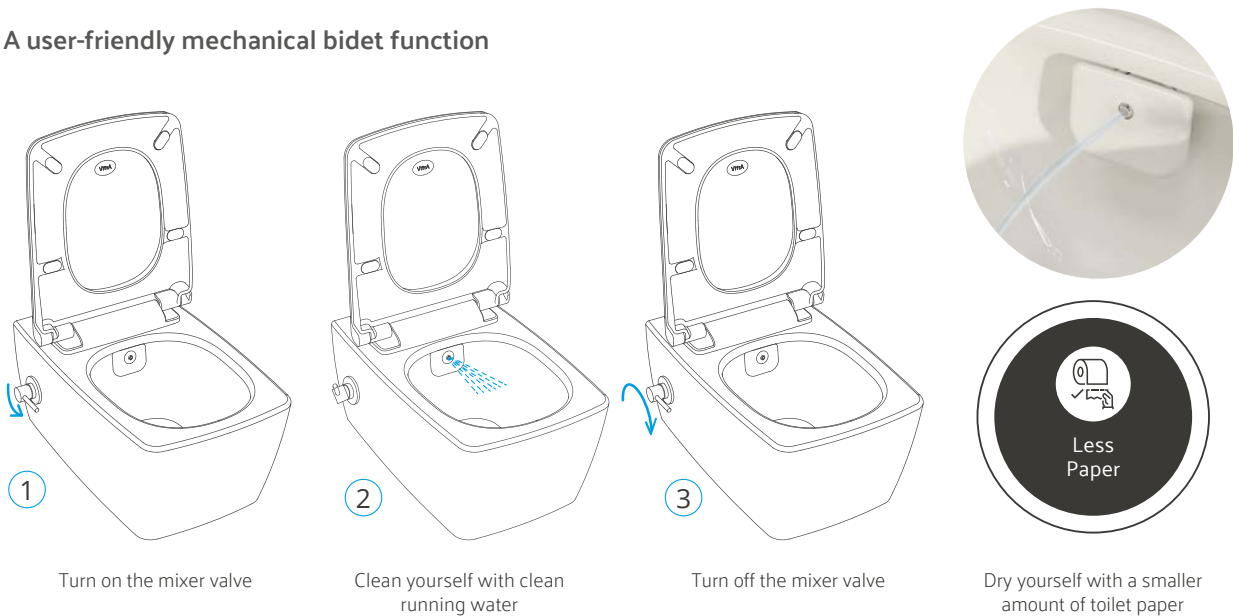

The Integra, Sento and M-Line Aquacare toilets feature soft-closing seats and our hygienic Rim-ex design (see page 8), and can also be used with the Vitrus cistern (see page 324).

When installing an Aquacare WC there is no additional equipment or preparation required for installation.

There is also a choice of WC shape to ensure it will blend with any bathroom design. The mixer tap can either be wall-mounted or integrated into the WC design for the ultimate in choice and flexibility.

A user-friendly mechanical bidet function

Available with an integrated or wall-mounted mixer valve.

Increased hygiene

Aquacare WCs feature a non-return valve providing an air break to prevent contaminated water from the pan travelling back through the system. Fully compatible with the EN1717 regulation which protects against the pollution of drinking water.

Beautifully designed

The Aquacare technology is hidden within the pan so it looks like a regular toilet and will integrate with any bathroom design. A soft-close seat is included with all models. Rim-ex technology is also included as standard making the toilet more hygienic and easier to clean.

Thermostatic control

The M-Line and Sento Aquacare toilets offer a thermostatic feature to ensure a consistent water temperature, to a maximum of 38° temperature. This is controlled via a mixer valve mounted on the side of the toilet.

Features and benefits

- Styles available:
 - Sento Aquacare
 - M-Line Aquacare
 - Integra Aquacare
- Choice of controller location; either wall-mounted or integrated into the WC design (except Integra).
- Wall-hung
- Rim-ex toilet design
- Soft-close seat

Quick and easy to install

Aquacare comes as a complete set. Included is a toilet with a pre-assembled and integrated air breaker and a soft-closing seat. No additional equipment or preparations besides water installation are required.

If maintenance is required, access is easy. One simple click removes the Aquacare cover located below the toilet seat.

Aquacare - Shower toilets

PRODUCT CODE:
7672B003-6203 Bidet function

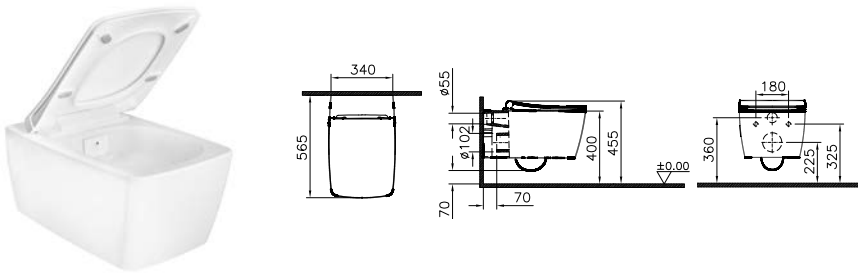

PRODUCT DESCRIPTION:
M-Line Aquacare wall-hung WC pan, Rim-ex

Smart Panel

Using the latest digital sensor technology we've created the most hygienic and efficient toilet flush available.

As the digital home evolves, Vitra has combined smart technology with water-saving design in a modern and elegant flush plate that is compatible with Vitra's wall-hung frames.

V-Care Smart Panel app

The Smart Panel system can be synced to the owner's mobile phone through Vitra's app, allowing the user to flush and view usage data for their toilet remotely. The app's regular reporting allows households to see their weekly water usage and identify how they can be more efficient.

Flush with success

Vitra's Smart Panel has three flushing options - a full flush, half flush and a periodic flush - allowing the user to have control over water usage. Designed with hygiene in mind, the new periodic flush mode can be set to regularly wash out the bowl, minimising the risk of dirt and stains accumulating, keeping waste pipes clean. An auto-flush mode is also available, supplying the optimum volume of water according to each flush.

Family-friendly features

For families, the smart flush plate can be locked as a safety precaution for children.

For a full list of features and specifications, visit vitra.co.uk

Frames and concealed cisterns

Eliminate the unsightly mess of cisterns, pipes, u-bends and other functional elements that spoil the look and ambience of your bathroom, by installing a wall-hung frame.

Install with confidence

Aside from a much tidier look, there are lots of practical benefits to using our wall-hung frames

Hygienic

Keeping a bathroom clean is so much easier with a wall-hung WC. All pipework, usually a haven for dust, is completely concealed, and with the WC pan fixed above the floor, it's so much easier to keep the floor clean.

Quiet

Not only is the cistern concealed behind a wall, but it's also manufactured with a specially-engineered fill valve, and lined with insulating styrofoam to keep filling noise to an absolute minimum.

Easy Access

The flush plate can be removed easily, providing easy access to internal fittings. Flush plates have a 5-year guarantee.

Space-Saving

A wall-hung WC takes up less room than a conventional WC, providing greater flexibility where space is at a premium. In addition, the tidier arrangement, with more available floor space, also creates the impression of a larger bathroom.

Quick & Easy Installation

An intuitive design makes installation quick and easy – a real advantage, particularly when carrying out multiple installations.

Water-Saving

The dual-flush action for both the slim and the regular wall-hung frame operates at 2.5/4 litre or 3/6 litre, resulting in as much as 70% reduced water consumption, benefiting both you and the environment.

Quality and assurance

All our wall-hung frames are subjected to rigorous reliability and performance testing.

Overflow

An overflow pipe located within the valve acts as a safety device. Overflow pipes are tested to ensure they can cope even in high water pressure areas.

Strength & Stability

Wall-hung WC pans and their concealed frames are designed to be able to support up to 400kg.

Durability

Our products are periodically tested for durability according to international standards. To pass this testing, every single component must still be functioning perfectly after 200,000 consecutive operations.

Leak Detection

Every cistern we manufacture is individually tested to ensure it is 100% watertight.

Flow Rate

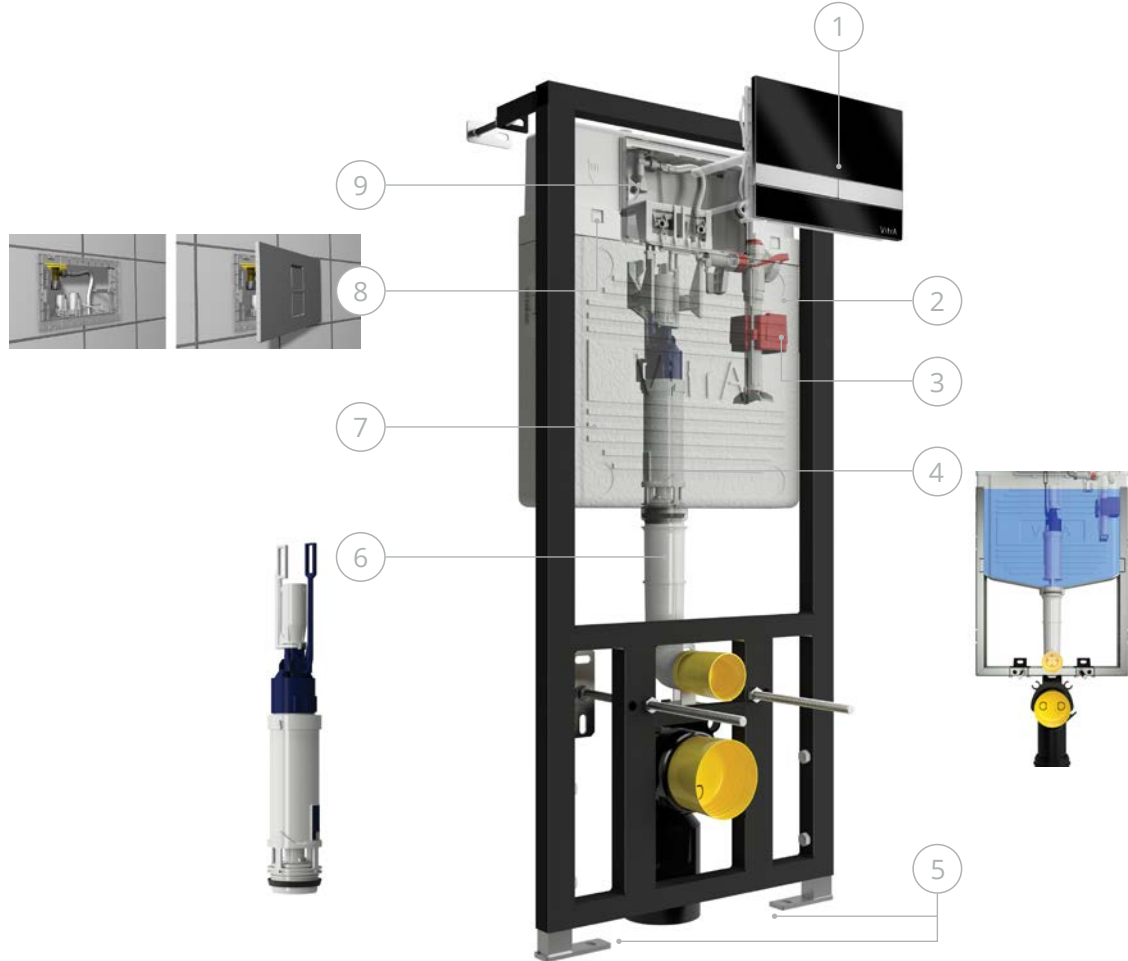

A wall-hung WC takes up less room than a conventional WC, providing greater flexibility where space is at a premium. In addition, the tidier arrangement, with more available floor space, also creates the impression of a larger bathroom.

Performance

All products are subjected to rigorous testing at our production facilities to ensure that they function perfectly before passing quality control.

Specific design features

- 1

Flush plate
The flush plate operates the cistern. It enables easy operation of the wall-hung frame and covers internal parts that remain in the wall.
- 2

Body
The filling and flushing valves are located in this part of the cistern. Produced from polyethylene (HDPE) raw materials, it offers more safety with its flexibility and resilience.
- 3

Filling valve
The filling valve is the system that fills the cistern with water. The filling valve is checked in Vitra labs for “water-tightness” via accelerated life testing 200,000 times. The filters above the filling valve eliminate the risk of clogging, ensuring durability and a long lifetime. New Vitra filling systems ensure fast and silent filling.

- 4

Overflow pipe
When too much water enters the cistern, the overflow pipe in the flushing mechanism channels the excess water into the WC pan, preventing the risk of flooding.
- 5

Metal stand
For Metal feet enable the easy adjustment of height from the floor and provide fixing points.
- 6

Flushing valve
The flushing valve transfers the water in the cistern to the WC pan. For correct and reliable functioning, flushing units are subjected to 200,000 watertightness and accelerated life tests at the factory.

- 7

Body styrofoam
The styrofoam coats the entire lower body and prevents condensation forming in the cistern and provides sound insulation.
- 8

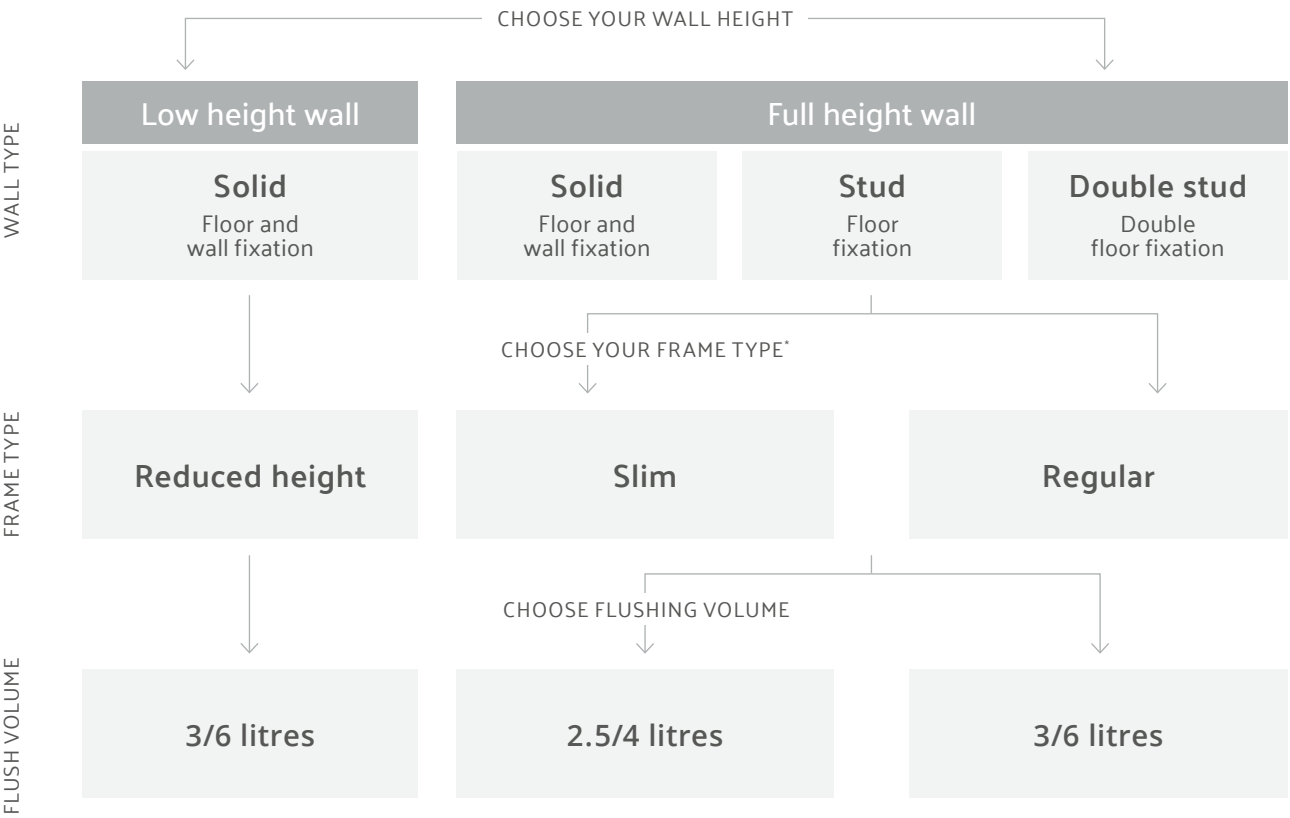

Panel gap
The panel gap on the body is designed to provide optimum opening space for the maintenance of the filling or flushing units and enabling easy access to the cistern. The size of this gap is very important for servicing purposes.
- 9

Intermediary hose
The intermediary hose that connects to the water piping inside the cistern can isolate the water flow during service-oriented interventions, and enables easy replacement of parts.

Frames

Vitra’s frame systems are crucial in supporting and holding our wall-hung toilets firmly in place without the need for expensive structural building work.

Whatever your requirements, Vitra’s range of frames offers you complete flexibility. The reduced height frame is perfect when space is at a premium or the room has a sloping roof or low window. Both the slim and regular sized frames can be used in solid, stud and double stud wall scenarios and are both available with a choice of flushing volumes.

*Check against our full range of wall-hung frames for WCs, urinals, bidets and washbasins at vitra.co.uk

Need an alternative to a wall-hung frame? Our Vitrus glass concealed cisterns (page 324) for wall-hung and back-to-wall WCs can be used with any wall type, removing the need to create a false wall to hide the frame.

Regular frames for wall-hung WCs

PRODUCT CODE:
742-5805-01 3/6 litre
742-5800-02 2.5/4 litre

PRODUCT DESCRIPTION:
Regular wall-hung frame,
floor and wall fixation

PRICE:
£274

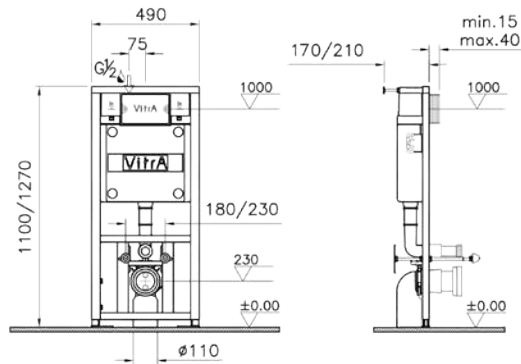

INSTALLATION TYPE:
Rapid, solid wall
Front wall: Lightweight construction
Back wall: Brick construction

CONTROL TYPE:
Dual flush

VOLUME OF WATER:
3/6 litres – Adjustable to be used at 2.5/4 litres
2.5/4 litres – Adjustable to be used at 3/6 litres

WEIGHT:
16kg

COMPATIBLE WITH:
Horizontal drainage connection
£6.50 – 437274YP
£25.50 – 436448YP
Electronic mechanism installation set
£85 – 300-1028

PRODUCT CODE:
742-4805-01 3/6 litre
742-4800-02 2.5/4 litre

PRODUCT DESCRIPTION:
Regular wall-hung frame,
floor fixation

PRICE:
£314

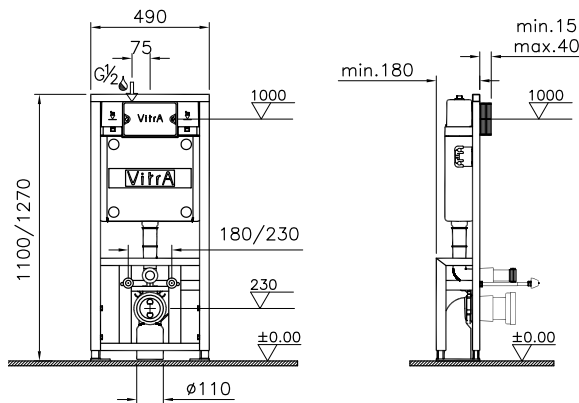

INSTALLATION TYPE:
Front wall: Lightweight construction
Back wall: Brick construction

CONTROL TYPE:
Dual flush

VOLUME OF WATER:
3/6 litres – Adjustable to be used at 2.5/4 litres
2.5/4 litres – Adjustable to be used at 3/6 litres

WEIGHT:
20kg

COMPATIBLE WITH:
Horizontal drainage connection
£6.50 – 437274YP
£25.50 – 436448YP
Electronic mechanism installation set
£85 – 300-1028

Regular frames for wall-hung WCs

PRODUCT CODE:
742-5850-01 3/6 litre
742-5850-02 2.5/4 litre

PRODUCT DESCRIPTION:
Regular wall-hung frame, double floor fixation

PRICE:
£546

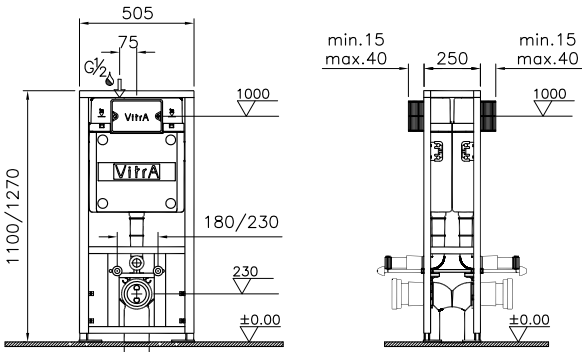

INSTALLATION TYPE:
Rapid, back-to-back
Front wall: Lightweight construction

CONTROL TYPE:
Dual flush

VOLUME OF WATER:
3/6 litres – Adjustable to be used at 2.5/4 litres
2.5/4 litres – Adjustable to be used at 3/6 litres

WEIGHT:
20kg

COMPATIBLE WITH:
Horizontal drainage connection
£6.50 – 437274YP
£25.50 – 436448YP
Electronic mechanism installation set
£85 – 300-1028

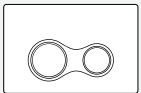

Rim-ex WCs are only compatible with 3/6 litre flushing mechanisms. For optimal performance it is recommended wall-hung Rim-ex pans are used with a full height frame and at 3/6 litre flushing setting.

Frames for washbasins, bidets and urinals

Sustainability & accreditations

We’re driven by our commitment to a sustainable future and the efficient use of water is one of our top priorities. We recognise our responsibility as a leading manufacturer of bathroom products to spearhead the water-saving movement having achieved the target set of reducing our own water consumption by 4% between 2017 and 2020.

We are also devoted to developing products and technologies that enable our customers to save water in their own homes. From aerators to eco-friendly cartridges, our innovative water-saving features mean you can save water while not compromising on design.

The European Water Label

The European Water Label empowers consumers with important information on the water and energy use of bathroom products.

With sustainability at our core, the vast majority of our products fall under the top water consumption band (Class A, using 5 litres or less of water).

WRAS

WRAS (Water Regulations Advisory Scheme) has been approved as compliant with the Water Supply (Water Fittings) Regulations and Scottish Byelaws. All WRAS-approved products undergo rigorous mechanical and water quality testing that ensures the product will keep water supply clean and free from contamination.

To see the full list of our WRAS-approved products, please visit [vitra.co.uk/about-us/sustainability](https://www.vitra.co.uk/about-us/sustainability)

Adjustable cartridges

Some of our mixers come with adjustable cartridges that limit the maximum heat and flow from the tap, which in turn can save up to 60% waste. Our water- and energy-saving products are marked throughout with these symbols.

Aerators

Aerators sit at the end of taps and add streams of air into the water flow. Water-saving and energy-saving, aerators significantly reduce the amount of water used while maintaining high water pressure. By directing water into one single downward flow, aerators also create a smoother flow and reduce splashing. Our ranges with aerators are marked throughout with the following symbols.

Our water-saving aerators use significantly less water while maintaining a strong flow of 5 litres per minute.

Our swivel aerators allow you to change the direction of the water flow easily, meaning you can reach all areas of the washbasin.

Our coin-slot aerators can be effortlessly removed with the use of a coin, making it easy to clean the threaded aerator.

Water pressures

Water pressure, measured in bars, describes the strength of water flow through a pipe. When choosing your bathroom brassware, it’s important to understand the water pressure in your water plumbing system. Whether it’s a gravity, combination boiler, pump-assisted or mains high pressure system (ask your installer if you’re unsure), identifying your system is key to finding a product that will give the best possible performance.

The minimum water pressure requirements for each product (low, medium or high) are marked in the brochure. Most products will suit any water system, however, the high pressure products are designed to work with high pressure systems for maximum pressure. Equally, if you have low water pressure, there are lots of products that will work for you.

Blue Life

Evolution depends on being adaptable to change. As the climate and the needs of our clients change, our ethos as a company evolves. In 2017, we initiated Blue Life, our pledge to greener production.

Since the Blue Life initiative began, we are now using 35% less water than before and have reduced energy consumption in our ceramic kilns factory by 15%. But this is just the beginning of what we are striving for.

We are taking this initiative to our products. Our 2.5/4ltr WC pan has been engineered to use up to 60% less water per flush than a standard design and our brassware is manufactured with adjustable pins for you to have control over water usage.

By choosing a Vitra product, you are contributing to saving the world’s natural resources.

Our pledge to the future

- Continue the use of renewable resources in the production process.
- Develop products that promote power and resource conservation.
- Make significant investments towards boosting eco-efficiency.

Guarantees

Furniture and mirrors	2 years	Wall-hung frames and concealed cisterns	5 years [†]
Sanitaryware	10 years		
Toilet seats	2 years	Acrylic baths	25 years
V-Care shower toilet	2 years	Bath panels	2 years
Aquacare bidet function	2 years	Brassware	10 years [†]
Flush plates (excluding infrared panels)	5 years	Shower systems	5 years [†]
Infrared and electronic products	2 years	Accessories	5 years
		Complementary parts (waste set & waste cover)	5 years

If a product fails due to a manufacturing fault, Vitra will offer a free replacement or replacement parts. If a product is not available, Vitra will offer an alternative to the same value.

[†]Replacement only for working parts - non transferable
