# Welcome to our Bathroom Collection technical brochure.

Helping your customers to choose the perfect Vitra bathroom is crucial. This technical brochure, to support our Signature and Bathroom Collections will assist you, by putting vital information at your fingertips.

Based on recent market research, we've brought together all the key technical elements and essential details for each range in this brochure: code, price, cut-outs and technical drawings, complete measurements, compatible products and additional information. We have also created a new shower toilet section to help guide you and your customers through the extensive range and options. And to make life easier, we've colour coded the different product ranges and categories so you'll have no trouble navigating your way through recommending the right Vitra products to your customers.

This technical brochure complements the customers' Bathroom Collection brochure, brimming with inspiring design ideas so they can create a bathroom to match their lifestyle. Providing only the basic technical information in the consumer brochure will encourage the customer to seek more guidance from you.

The Signature and Bathroom Collection ranges have been split in this brochure. For instance, a green strip highlights when a range belongs to the Signature collection.

To keep things simple, we've used icons throughout to identify features. You'll find a clear quick reference for these at the beginning of this brochure along with a useful matrix for furniture finishes and a section about all our beautiful bathroom innovation. At the end of the brochure you can find the index.

Hopefully, having all this information in one easy-to-navigate brochure will make it easy to recommend the Vitra ranges (see page 28) to your customers and help them to design their new bathroom with confidence.

Icon guide

Sanitaryware code identification

- A

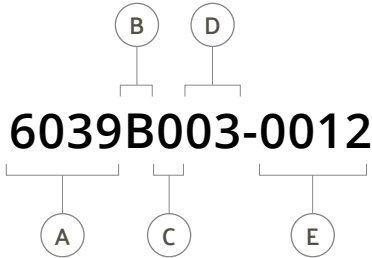

**Product code**  
The first part of the code defines the model of the product
- B

**Packaging specification code**  
B: In a box bearing VitrA logo  
L: Loose product; without box
- C

**Special application code**  
0: VitrA Hygiene  
4: VitrA Clean + VitrA Hygiene
- D

**Colour code**  
For example  
01: Matt White  
03: White  
20: Matt Taupe  
70: Black  
83: Matt Black
- E

**Technical specification code**  
Shows the technical features of the product. For instance the number of tap holes or bidet features.

Features

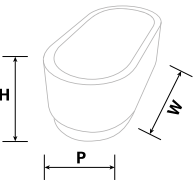

- Water-saving WC**  
WCs marked with this symbol have a special bowl structure and are specifically designed to flush with both lower (2.5/4 litre) and typical (3/6 litre) water volumes.  
  
By using less water, these water saving WCs benefit you and the environment. All VitrA standard height wall-hung frames come with dual flush function as standard in both 2.5/4 litre and 3/6 litre options.
- Comfort height WC**  
These WC pans are taller than regular pans for added comfort and ease of use.
- Fischer installation system**  
A simple, elegant installation system for use with wall-hung WCs. The fixings are hidden from sight by the use of internal ABS sleeves, creating a clean, smooth design.
- Accessible**  
These products are wheelchair accessible and provide enhanced convenience in the bathroom.
- Water Regulations Advisory Scheme**  
Water Regulations Advisory Scheme Contributing to the protection of public health by preventing contamination of public water supplies and encouraging the efficient use of water by promoting and facilitating compliance with the Water Supply (Water Fittings) Regulations and Scottish Byelaws.
- VitrA Hygiene**  
Coats all VitrA ceramicware and inhibits the growth of harmful bacteria by **99.9%**
- VitrA Clean**  
Limescale is persistent in most bathrooms. Washbasins, WC pans and bidets are coated with VitrA Clean technology. No harsh chemical cleaning agents are needed to keep them beautifully stain-free for years.
- Quick release WC seat**  
The screw-free fitting of the Quick Release VitrA WC Seat makes it easy to remove and refit after cleaning.
- Touch free**  
Controlled by a built-in sensor, our touch free technology ensures increased hygiene in the bathroom.
- Rim-ex**  
Offering effortless cleaning and innovative, hygienic design. VitrA's rimless WC pan eliminates the areas where germs gather and multiply, giving a superior level of hygiene.

Product position

- LSB = Left side basin
- RSB = Right side basin
- LHH = Left hand hinged
- RHH = Right hand hinged
- LWP = Left washbasin position
- RWP = Right washbasin position

# VitrA innovation

We have listed some of the extra special ways VitrA invests in great product design to make the bathroom a safer, cleaner and better designed space.

## VitrA Hygiene coating comes as standard

A unique glazing process developed by VitrA that prevents germs from multiplying. The VitrA Hygiene glaze coats all external and internal surfaces before firing in a process that ensures lifetime VitrA Hygiene protection. VitrA Hygiene is applied to all VitrA products as standard.

## Rim-ex WC pans

Rim-ex harnesses the latest in toilet bowl design. With a rimless, smooth internal pan that eliminates anywhere for germs and dirt can accumulate, the toilet that stays cleaner and actively resists dirt build-up.

Tests prove Rim-ex is **95%** more hygienic than standard toilet pans\* and it is much easier to clean – as there are no ledges you have complete visibility of the bowl. The unique design of the pan incorporates a water diverter to direct the flush around the bowl, which is easily removed for cleaning.

\* Tests undertaken by the Akdeniz University, Turkey, show VitrA Rim-ex toilet pans are easier to clean and **95%** more hygienic compared to standard toilet pans.

## Shower toilets for that just showered feeling

Our latest generation Shower Toilets (see page 12), combine the functionality of a toilet with the personal hygiene benefits of a bidet. From a fully customisable and remote-controlled to a simple mechanical bidet there is a shower toilet that is right for everyone. A combination of being wall-hung and having a rimless Rim-ex bowl makes the toilet hygienic and easy to keep clean.

VitrA Aquacare is a simple mechanical bidet (see page 14), with the uniquely designed, integrated air-breaker protects the household supply of drinking water from contamination, in accordance with the DIN EN1717 regulations, as well as the protection of a DVGW approval. Sold as a complete set, installing an Aquacare toilet is fast and simple. Aquacare comes with a choice of either an integrated thermostatic controller or a non thermostatic wall-mounted mixer valve.

## Smart Panel

As the digital home evolves, VitrA has combined smart technology with water-saving design in a modern and elegant flush plate that is compatible with VitrA 742 and 748 frames (see page 26).

## V-Box new slimmer design for easy installation

Introducing a new concealed part design for our shower systems. This new V-Box can be fitted to a minimum depth of **77mm**, which is standard in the UK and the unit is compatible with our thermostatic shower mixers on page 266.

## Striking finishes

Physical Vapour Deposition (PVD) is a state-of-the-art manufacturing process in which metal powders are vaporised and deposited onto a surface. The metallic coating presents a striking finish and remains corrosion and scratch-resistant. Available on our Origin brassware (see page 206).

## VitrA Fresh for a cleaner WC

VitrA Fresh is available in our M-Line series and features a built-in tank that dispenses detergent\*\* with every flush, helping to keep the bathroom smelling fresh, the pan clean and protects against the build-up of bacteria. The removable lid allows for easy refill and cleaning.

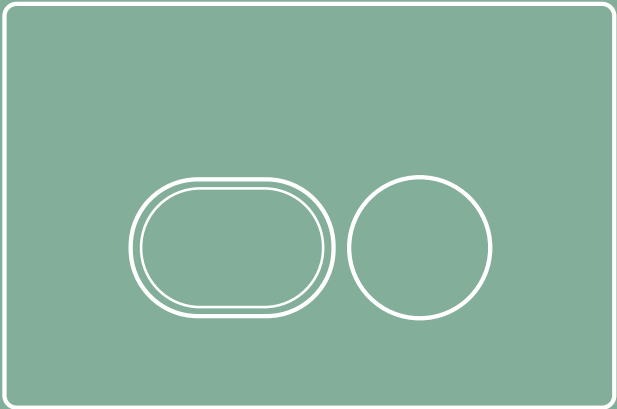

\*\* The liquid detergent dispenser is safe to use with most commercially available non-abrasive toilet cleaning liquids which include hypochlorous cleaning agents and bleach of up to **12.5PH**.

# Advanced technology in the bathroom

Here is a summary of some of the new innovations and technologies transforming the bathroom space. Starting with the new touch free basin mixer through to the latest generation of shower toilets which combine smart technology with the functionality of a toilet with the personal hygiene benefits of a bidet. Our Aquacare shower toilet benefits from an integrated and mechanically operated bidet function, as well as complete ease of installation, and our flush plates offer a modern alternative to a traditional handle or lever-based flushing mechanism. They release exactly the right quantity of water, helping to monitor and conserve usage in one simple action.

Smart Panel	26

# V-Care

Our latest generation of V-Care shower toilets combine smart technology with the personal hygiene benefits of a bidet.

There are three options to choose from, all featuring Rim-ex technology (see page 8):

### V-Care Prime

The Prime model raises the standard in terms of features and for the ultimate convenience there is a wall-hung option and a floor-standing version perfect for a retrofit solution. The stylish design complements any bathroom style and the sensor light provides ambient light within the bathroom, perfect for night time visits to the bathroom. There is a full range of cleaning options, including a gentle front cleaning function for women. Heated seat, variable wash settings and drying options are included for the ultimate personalised washing experience.

### V-Care Comfort

The mid-range option, with the female and male wash function is perfect for families. Auto open and close seat is included as well as variable washing and drying options. Air deodorising is also included.

### V-Care Essential

Entry level option but still with plenty of features to meet the cleaning needs of most people. If you don't want the drying option this is the choice for you.

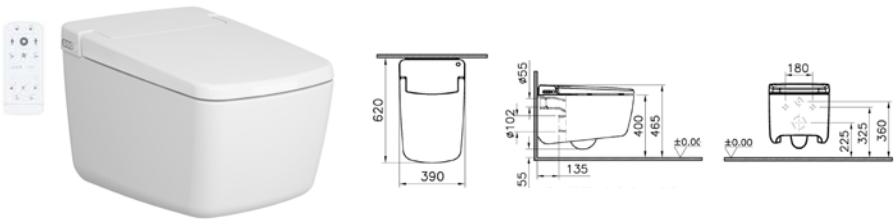

All the V-Care WCs are controlled using a stylish remote control and Vitra Prime can also be used using the app, so the wash experience can be pre programmed.

# Aquacare shower toilet

Developed by the Vitra Design and Innovation Team, Aquacare is a bidet and toilet in one, offering a refreshing, clean and hygienic bathroom experience. No electrical connections are required as the water is controlled via standard plumbing methods.

The Integra, Sento and M-Line Aquacare toilets feature soft-closing seats and our hygienic Rim-ex design (see page 8), and can also be used with the Vitrus cistern (see page 334).

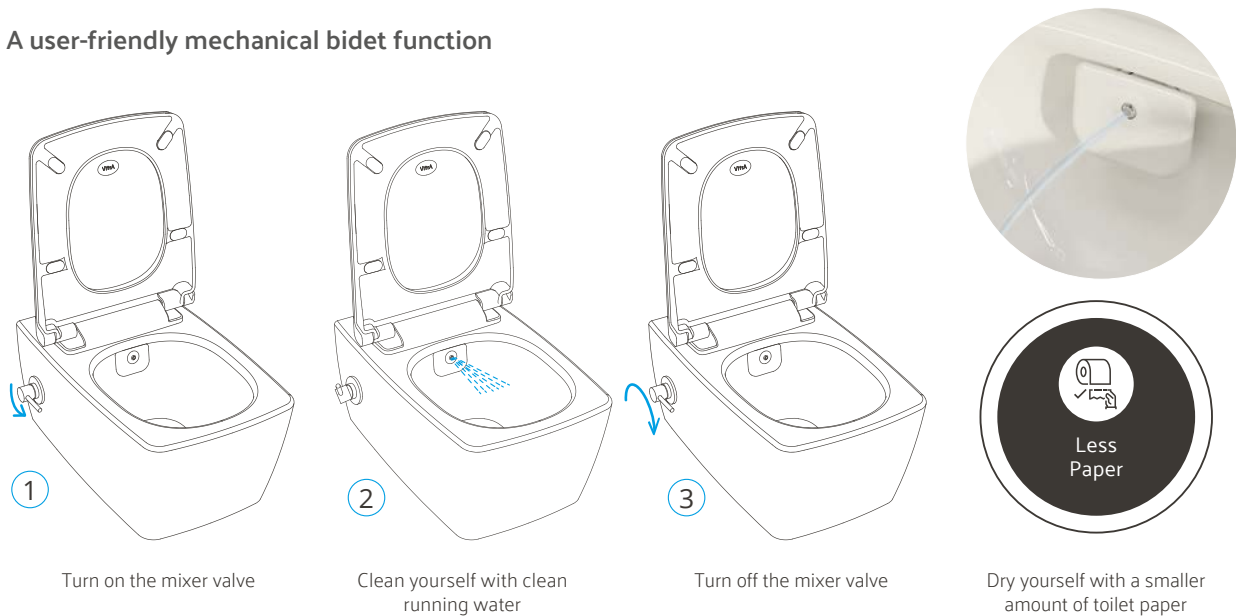

When installing an Aquacare WC there is no additional equipment or preparation required for installation.

There is also a choice of WC shape to ensure it will blend with any bathroom design. The mixer tap can either be wall-mounted or integrated into the WC design for the ultimate in choice and flexibility.

Detail of the integrated air breaker

## A user-friendly mechanical bidet function

Available with an integrated or wall-mounted mixer valve.

## Increased hygiene

Aquacare WCs feature a non-return valve providing an air break to prevent contaminated water from the pan travelling back through the system. Fully compatible with the EN1717 regulation which protects against the pollution of drinking water.

## Beautifully designed

The Aquacare technology is hidden within the pan so it looks like a regular toilet and will integrate with any bathroom design. A soft-close seat is included with all models. Rim-ex technology is also included as standard making the toilet more hygienic and easier to clean.

## Thermostatic control

The M-Line and Sento Aquacare toilets offer a thermostatic feature to ensure a consistent water temperature, to a maximum of 38° temperature. This is controlled via a mixer valve mounted on the side of the toilet.

## Features and benefits

- Styles available:
  - Sento Aquacare
  - M-Line Aquacare
  - Integra Aquacare
- Choice of controller location; either wall-mounted or integrated into the WC design (except Integra).
- Wall-hung
- Rim-ex toilet design
- Soft-close seat

## Quick and easy to install

Aquacare comes as a complete set. Included is a toilet with a pre-assembled and integrated air breaker and a soft-closing seat. No additional equipment or preparations besides water installation are required.

If maintenance is required, access is easy. One simple click removes the Aquacare cover located below the toilet seat.

Aquacare - Shower toilets

PRODUCT CODE:  
7672B003-6203 Bidet function

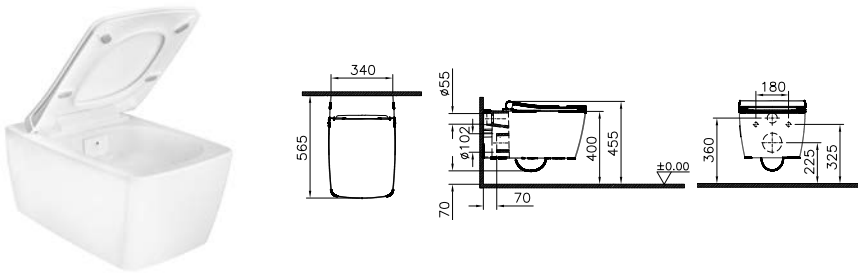

PRODUCT DESCRIPTION:  
M-Line Aquacare wall-hung WC pan, Rim-ex

# Smart Panel

Using the latest digital sensor technology we've created the most hygienic and efficient toilet flush available.

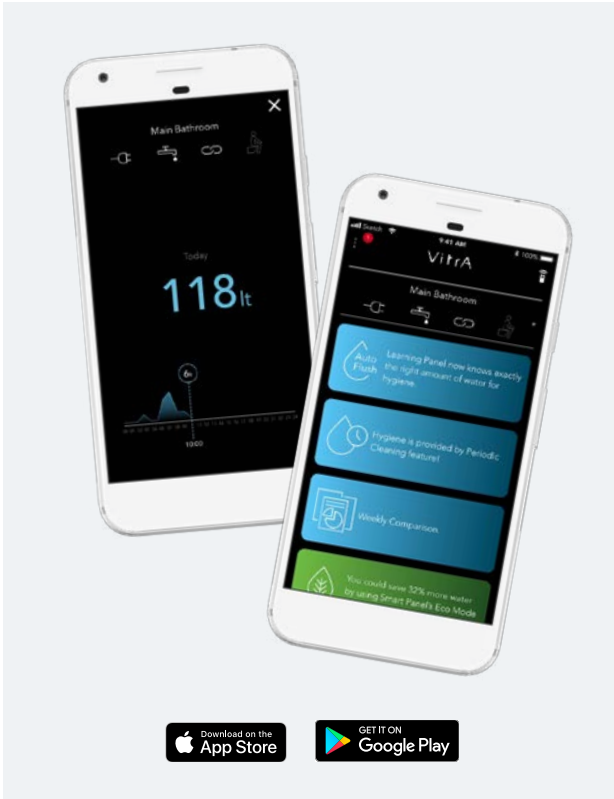

As the digital home evolves, Vitra has combined smart technology with water-saving design in a modern and elegant flush plate that is compatible with Vitra's wall-hung frames.

## V-Care Smart Panel app

The Smart Panel system can be synced to the owner's mobile phone through Vitra's app, allowing the user to flush and view usage data for their toilet remotely. The app's regular reporting allows households to see their weekly water usage and identify how they can be more efficient.

## Flush with success

Vitra's Smart Panel has three flushing options - a full flush, half flush and a periodic flush - allowing the user to have control over water usage. Designed with hygiene in mind, the new periodic flush mode can be set to regularly wash out the bowl, minimising the risk of dirt and stains accumulating, keeping waste pipes clean. An auto-flush mode is also available, supplying the optimum volume of water according to each flush.

## Family-friendly features

For families, the smart flush plate can be locked as a safety precaution for children.

For a full list of features and specifications, visit [vitra.co.uk](http://vitra.co.uk)

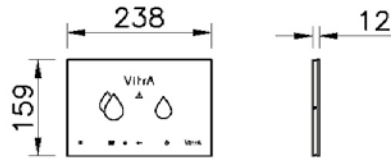

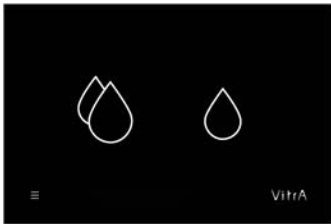

# Smart Panel

**PRODUCT CODE:**  
742-1501 For 742 regular frames

**COMPATIBLE WITH:**  
Electronic mechanism installation set  
£85 - 300-1028

**Extensive choice of products**

Offering ceramic sanitary ware, furniture, smart products, showers, taps, bathtubs and accessories.

**Taps in five colourways**

Root is available in five colour finishes; Chrome, Brushed Nickel, Matt Black, Copper and Gold allowing you to style your whole bathroom using one range.

**Commitment to Blue Life**

By choosing a Vitra product you are contributing to saving the world's natural resources.

**European Water Label supporter**

With sustainability at our core, the vast majority of our products fall under the best water consumption band (Class A, using 5 litres or less of water).

**Reasons to recommend Vitra**

**Vitra Hygiene**

A unique glazing process applied as standard to all our ceramic products, developed by Vitra that prevents germs from multiplying.

**Rim-ex**

A rimless, smooth pan that eliminates areas for germs and dirt to accumulate. The toilet stays cleaner for longer and actively resists dirt build-up.

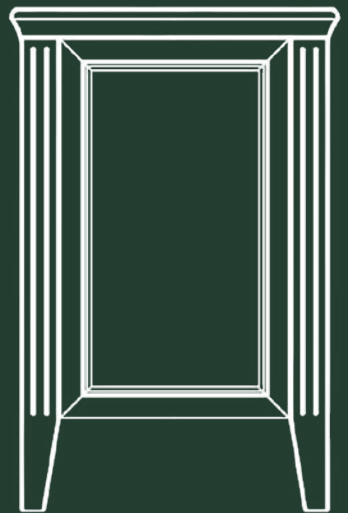

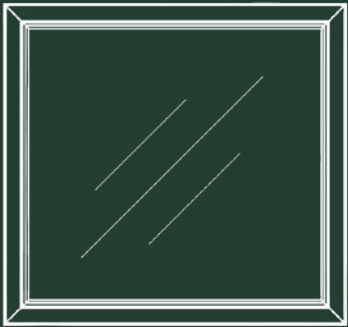

**Shower toilets**

Vitra offers two styles of shower toilet: V-Care or Aquacare to meet all your shower toilet needs.

# Bathroom ranges

We use high-quality materials with innovative design and space-saving technology to create bathroom suites and products that are practical, durable, and above all, a pleasure to use. In this brochure you will find full product listings and complete technical specifications for all of our Bathroom ranges, taps and accessories.

# Valarte

Inspired by Shaker design, the Valarte range is a timeless collection that will stay looking graceful for years to come.

Offering simplicity of design and fine craftsmanship, it is equally at home in modern or traditional settings. A comprehensive furniture range that includes vanities from 65 – 100cm, a statement towel cupboard and a variety of dresser pieces. Matching bath panels available, see page 200.

# Shift

The bold structures of Shift are balanced by its subtle curved edges, resulting in an elegant bathroom range.

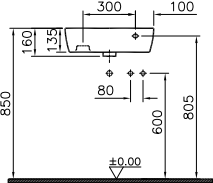

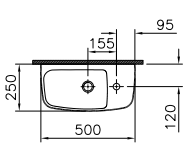

Highly adaptable, Shift allows for a greater degree of flexibility in the design of the space - it would work with a variety of tap ranges, wastes and accessories.

# Root Flat

Root Flat offers three different finishes: high gloss, matt and natural wood.

The high gloss colours add a shine to the bathroom with their smooth gloss finish.

The matt finishes work perfectly for creating a modern looking bathroom. Contrasted with natural wood on the inside of the drawers, these finishes create a warming balance.

Natural wood options are available for those who want the warm and calming effect of wood in their bathrooms. It provides a stylish and natural contrast to the anthracite colour wood inside the drawers of the washbasin units.

Furniture range available in

High Gloss White

High Gloss Pearl Grey

High Gloss Anthracite

High Gloss Sahara Beige

Matt Rock Grey

Matt Storm Grey

Matt Dark Blue

Minibox built-in shower mixers	274
Flow diverters	278
Bath spouts	282
Hand showers and outlets	284
Showerheads	286
Connection pipes for showerheads	287
Aquaheat shower packs	288
Aquaheat shower mixers	292
Shower columns	295
Move shower column	296
Complete built-in thermostatic shower solutions	297

## Choosing your shower system

Choosing the right shower system is one of the most important aspects of bathroom design, especially given the wide variety of shower valves, handshowers and showerhead styles to choose from.

### What is a shower valve?

The shower valve controls the flow of water, similar to the tap on a basin. There are two key considerations.

Firstly, shower valves can be either concealed behind the wall or exposed, typically a horizontal bar sits outside of the wall and contains all of the working parts.

### Concealed shower valves

Locating the shower valve behind the wall creates a contemporary look, allows for more space under the showerhead and makes cleaning easy because the only visible part of a concealed shower valve is the control plate. For increased flexibility the concealed valves can also be placed on a wall away from the outlet (bathtub, handshower or showerhead) they are controlling. For instance the valve could be installed at the entrance to the shower on one wall, but the shower kit (slide rail, fixed head etc.) can be positioned within the shower enclosure on the opposite side.

### Exposed shower valves

Unlike a concealed shower valve where the working parts are out of sight behind the wall, an exposed shower valve is ideal if you have solid brick wall that cannot accommodate a concealed shower valve or if you are looking for a quick, easy to fit solution.

The second consideration is whether you want the shower water temperature to be regulated. Thermostatic shower valves are designed to prevent fluctuations in the temperature of the water. This is an important safety consideration where extremes in water temperature can be dangerous.

Standard or manual shower valves are non-thermostatic and do not regulate the water temperature, this means if a tap is turned on elsewhere in the property the water from the shower may run too hot or too cold.

### VitrA offers a choice of concealed shower valves:

**V-Box** Thermostatic valve options only (see page 266)

**Aquaheat** Thermostatic only (see page 292)

**Minibox** Standard (manual) valve only (see page 274)

### Introducing V-Box

V-Box, by VitrA, is the new generation of concealed shower valve enabling 3 water outlets (bathtub, handshower or showerhead). V-Box can be trimmed to fit a 77mm wall depth which is standard in the UK and is compatible with our thermostatic shower mixers listed on page 267.

For the visible (exposed) part of the V-Box shower valve there is a choice of 3 styles; each with a full range of matching basin and bath fillers.

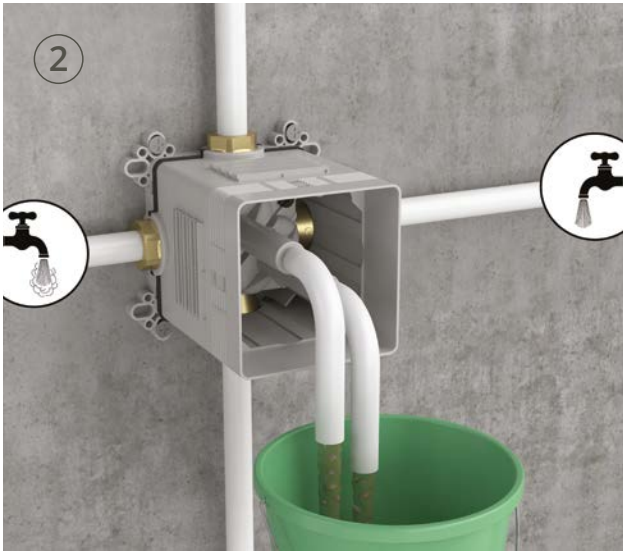

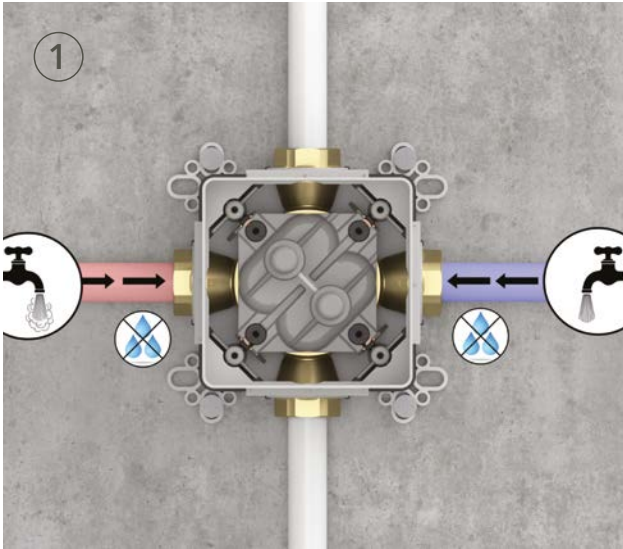

### Water outlet options

<b>1-way:</b>  Shower mixer with adjustable water temperature control for either handshower or showerhead.	<b>2-way:</b>  Water can be diverted to two of the following options: handshower, showerhead or to the bath. Water temperature is adjusted using one controller and the hot and cold water feed separately into the concealed valve.	<b>3-way:</b>  Using a diverter, the water can be directed to either the handshower, showerhead or to the bath.
--	--	---

Diverter enables the flow of water to be switched from one outlet to another for example to the handshower or showerhead.

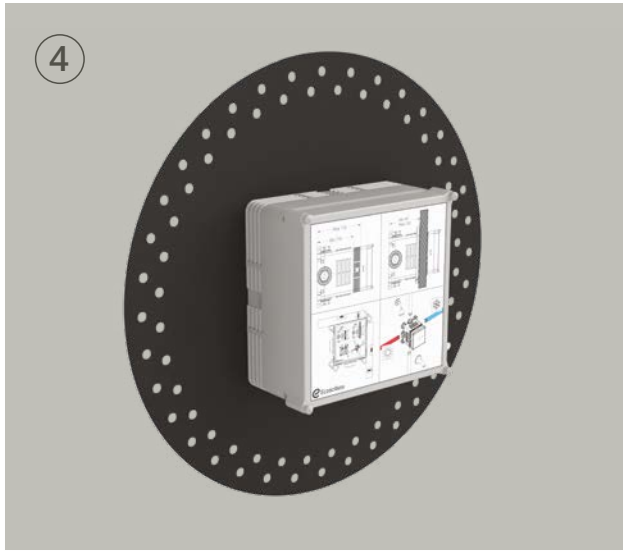

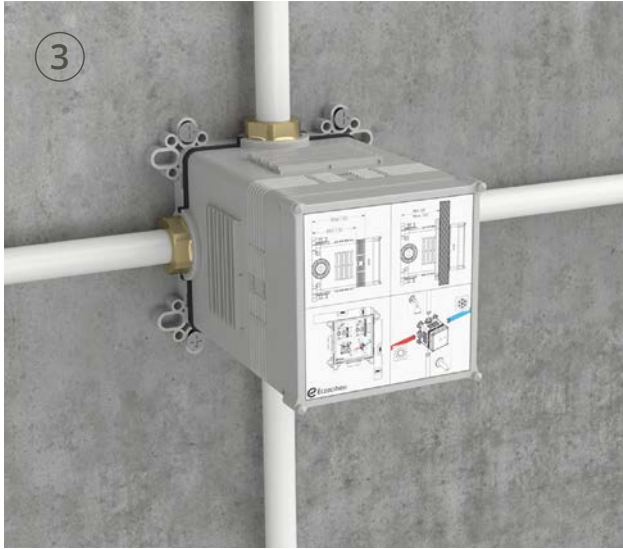

V-Box installation

- 1

**Impermeability Test**  
The water inlet pipes are fitted as shown above. Ensures the V-Box is mounted correctly and tightly to prevent leaks. There are also multiple fixing points.
- 2

**Cleaning**  
After connecting the water feeds the special V-Box design also allows for any debris that may have accumulated from the installation process to be flushed out.

- 3

**Gypsum Plate Wall Mount**  
Once the water inlet pipes are connected and cleaned, the box is fitted to the wall using the multiple fixing points. Special design enables easy mounting on gypsum plate walls.
- 4

**Humidity Protection**  
To further protect the mechanism from humidity within the bathroom environment an insulating mattress is fitted. Additional sealing cuff protects the wall from humidity. After tiling is completed, the front of the box is trimmed to the correct depth and the appropriate plate can be fitted.

Choosing the right shower system with V-Box

Whether you are looking for a square or round contemporary design, there is a range suitable for any bathroom setting.

After the tiling is completed the front of the box is trimmed to the correct depth and the appropriate brassware is then fitted.

V-Box can be used with one, two or three-way outlets. Within the compatible ranges there are bath mixers and thermostatic bath/shower mixers and diverters. V-Box can be used with Root, Minimax S, Origin, Suit, and Aquacontrol exposed parts, providing choice for consumers. All exposed parts, including the handles are made of metal.

# Concealed cisterns

Our frame systems are crucial to any modern bathroom, supporting and holding wall-hung toilets firmly in place. Frames are available in standard and reduced height, to give the freedom to create a stunning room without the need for expensive structural building work.

Frames and concealed cisterns	324
Vitrus	334

# Frames and concealed cisterns

Eliminate the unsightly mess of cisterns, pipes, u-bends and other functional elements that spoil the look and ambience of your bathroom, by installing a wall-hung frame.

## Install with confidence

Aside from a much tidier look, there are lots of practical benefits to using our wall-hung frames

### Hygienic

Keeping a bathroom clean is so much easier with a wall-hung WC. All pipework, usually a haven for dust, is completely concealed, and with the WC pan fixed above the floor, it's so much easier to keep the floor clean.

### Quiet

Not only is the cistern concealed behind a wall, but it's also manufactured with a specially-engineered fill valve, and lined with insulating styrofoam to keep filling noise to an absolute minimum.

### Easy Access

The flush plate can be removed easily, providing easy access to internal fittings. Flush plates have a 5-year guarantee.

### Space-Saving

A wall-hung WC takes up less room than a conventional WC, providing greater flexibility where space is at a premium. In addition, the tidier arrangement, with more available floor space, also creates the impression of a larger bathroom.

### Quick & Easy Installation

An intuitive design makes installation quick and easy – a real advantage, particularly when carrying out multiple installations.

### Water-Saving

The dual-flush action for both the slim and the regular wall-hung frame operates at 2.5/4 litre or 3/6 litre, resulting in as much as 70% reduced water consumption, benefiting both you and the environment.

## Quality and assurance

All our wall-hung frames are subjected to rigorous reliability and performance testing.

### Overflow

An overflow pipe located within the valve acts as a safety device. Overflow pipes are tested to ensure they can cope even in high water pressure areas.

### Strength & Stability

Wall-hung WC pans and their concealed frames are designed to be able to support up to 400kg.

### Durability

Our products are periodically tested for durability according to international standards. To pass this testing, every single component must still be functioning perfectly after 200,000 consecutive operations.

### Leak Detection

Every cistern we manufacture is individually tested to ensure it is 100% watertight.

### Flow Rate

A wall-hung WC takes up less room than a conventional WC, providing greater flexibility where space is at a premium. In addition, the tidier arrangement, with more available floor space, also creates the impression of a larger bathroom.

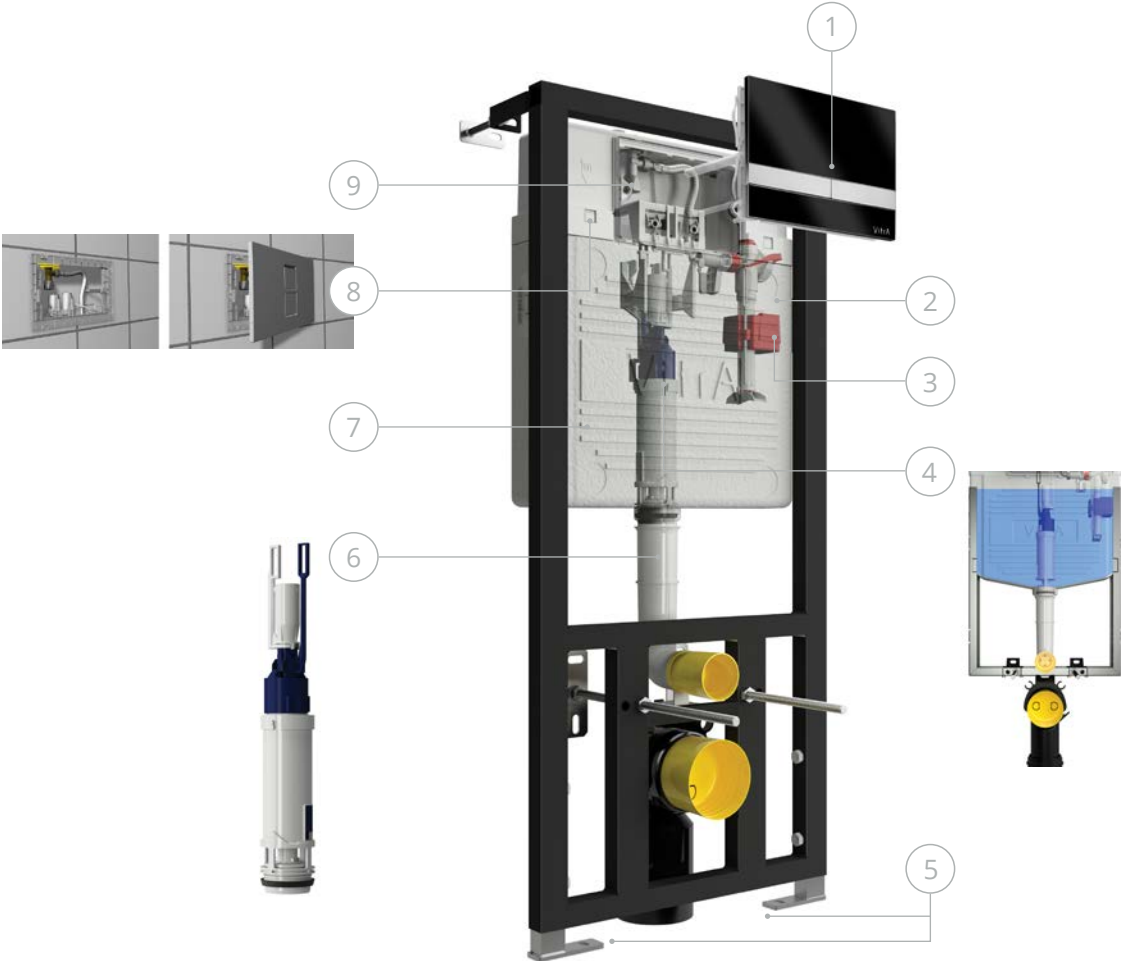

### Performance

All products are subjected to rigorous testing at our production facilities to ensure that they function perfectly before passing quality control.

Specific design features

- 1 Flush plate**  
The flush plate operates the cistern. It enables easy operation of the wall-hung frame and covers internal parts that remain in the wall.
- 2 Body**  
The filling and flushing valves are located in this part of the cistern. Produced from polyethylene (HDPE) raw materials, it offers more safety with its flexibility and resilience.
- 3 Filling valve**  
The filling valve is the system that fills the cistern with water. The filling valve is checked in Vitra labs for "water-tightness" via accelerated life testing 200,000 times. The filters above the filling valve eliminate the risk of clogging, ensuring durability and a long lifetime. New Vitra filling systems ensure fast and silent filling.

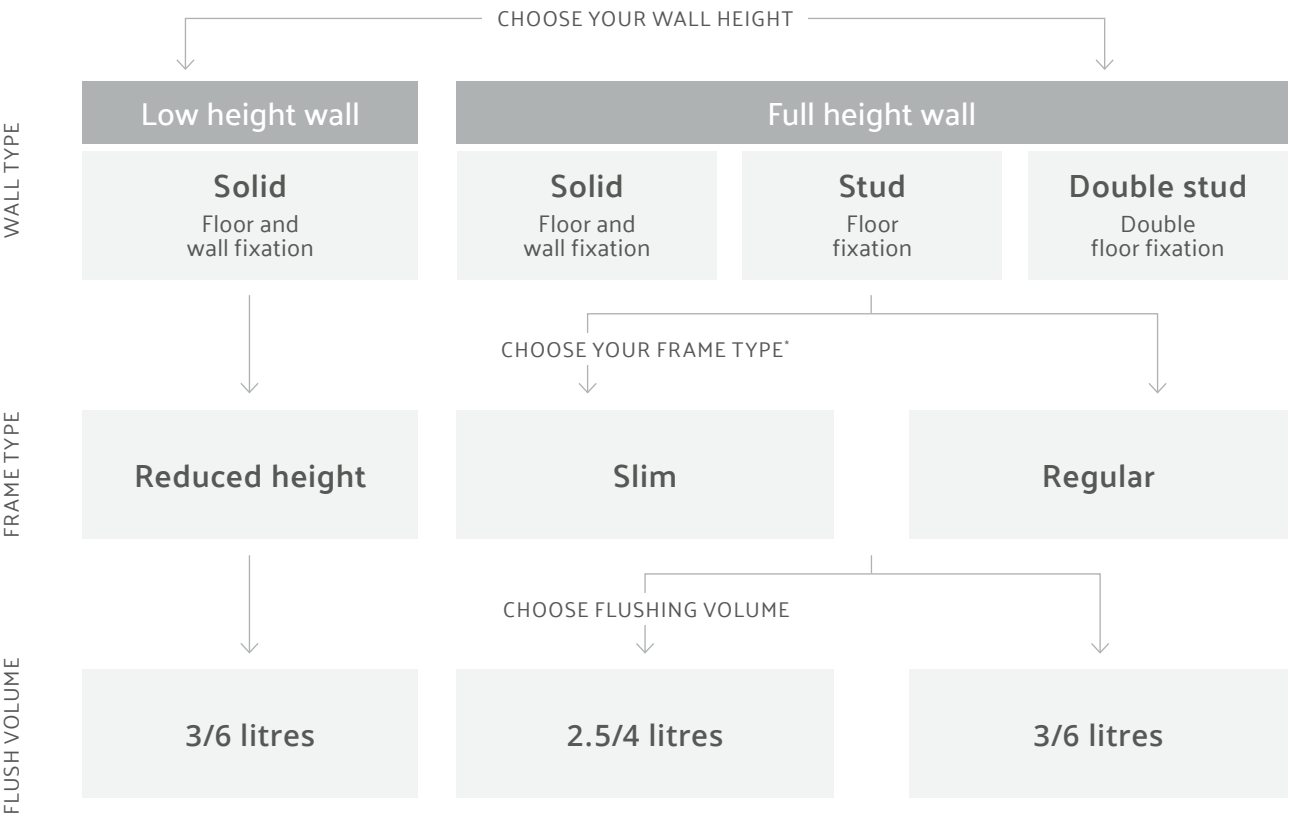

- 4 Overflow pipe**  
When too much water enters the cistern, the overflow pipe in the flushing mechanism channels the excess water into the WC pan, preventing the risk of flooding.
- 5 Metal stand**  
For Metal feet enable the easy adjustment of height from the floor and provide fixing points.
- 6 Flushing valve**  
The flushing valve transfers the water in the cistern to the WC pan. For correct and reliable functioning, flushing units are subjected to 200,000 watertightness and accelerated life tests at the factory.

- 7 Body styrofoam**  
The styrofoam coats the entire lower body and prevents condensation forming in the cistern and provides sound insulation.
- 8 Panel gap**  
The panel gap on the body is designed to provide optimum opening space for the maintenance of the filling or flushing units and enabling easy access to the cistern. The size of this gap is very important for servicing purposes.
- 9 Intermediary hose**  
The intermediary hose that connects to the water piping inside the cistern can isolate the water flow during service-oriented interventions, and enables easy replacement of parts.

Frames

Vitra's frame systems are crucial in supporting and holding our wall-hung toilets firmly in place without the need for expensive structural building work.

Whatever your requirements, Vitra's range of frames offers you complete flexibility. The reduced height frame is perfect when space is at a premium or the room has a sloping roof or low window. Both the slim and regular sized frames can be used in solid, stud and double stud wall scenarios and are both available with a choice of flushing volumes.

\*Check against our full range of wall-hung frames for WCs, urinals, bidets and washbasins at [vitra.co.uk](http://vitra.co.uk)

Need an alternative to a wall-hung frame? Our Vitrus glass concealed cisterns (page 334) for wall-hung and back-to-wall WCs can be used with any wall type, removing the need to create a false wall to hide the frame.

## Regular frames for wall-hung WCs

**PRODUCT CODE:**

**PRODUCT CODE:**  
780-3810

**PRODUCT DESCRIPTION:**  
Urinal installation frame,  
floor and wall fixation

**PRICE\*:**  
£156

**INSTALLATION TYPE:**  
Urinal and flusher

**WEIGHT:**  
11.8kg

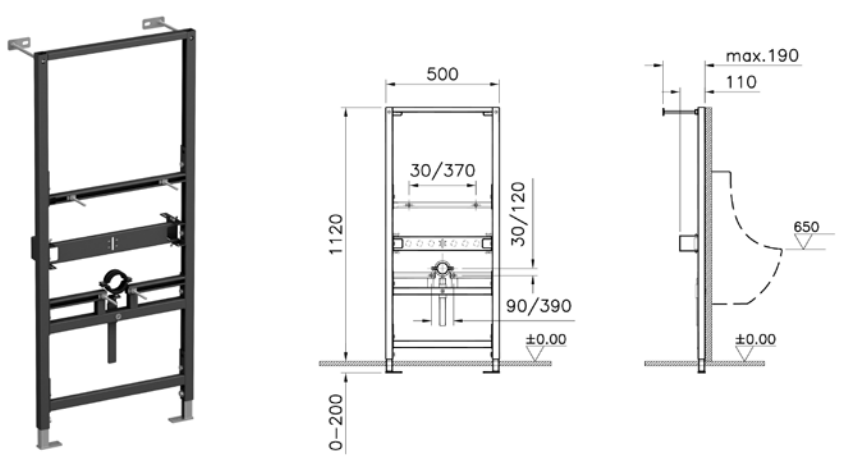

**PRODUCT CODE:**  
780-3800

**PRODUCT DESCRIPTION:**  
Urinal installation frame,  
floor and wall fixation

**PRICE\*:**  
£133

**INSTALLATION TYPE:**  
Urinal

**WEIGHT:**  
10.9kg

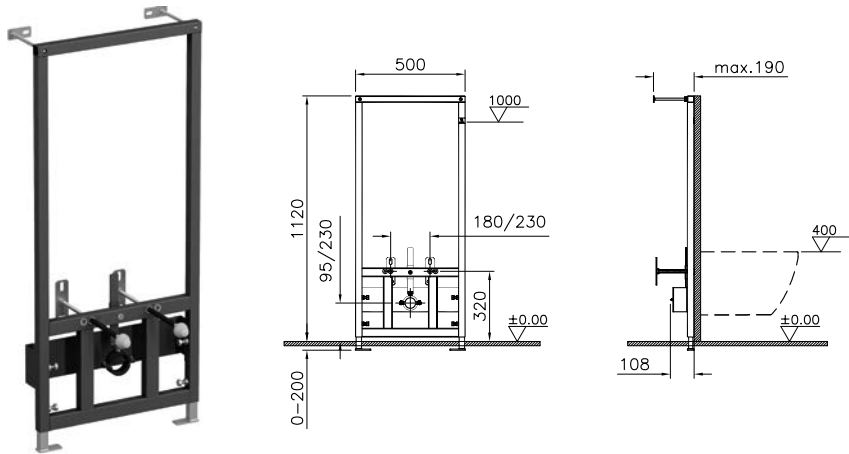

**PRODUCT CODE:**  
780-5800

**PRODUCT DESCRIPTION:**  
Bidet installation frame,  
floor and wall fixation

**PRICE\*:**  
£122

**INSTALLATION TYPE:**  
Bidet

**WEIGHT:**  
11.3kg

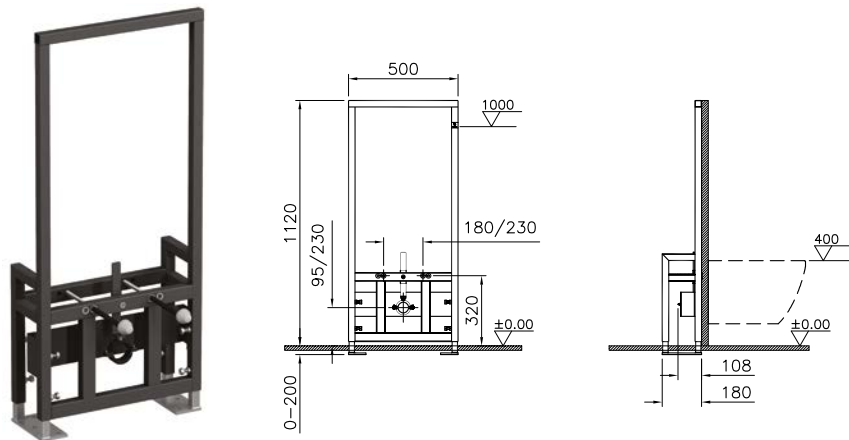

**PRODUCT CODE:**  
780-4800

**PRODUCT DESCRIPTION:**  
Floor-mounted bidet installation  
frame, floor fixation

**PRICE\*:**  
£151

**INSTALLATION TYPE:**  
Floor-mounted bidet

**WEIGHT:**  
16.1kg

## Frames for washbasins, bidets and urinals

# Sustainability and accreditations

We're driven by our commitment to a sustainable future and the efficient use of water is one of our top priorities. We recognise our responsibility as a leading manufacturer of bathroom products to spearhead the water-saving movement having achieved the target set of reducing our own water consumption by 4% between 2017 and 2020.

We are also devoted to developing products and technologies that enable our customers to save water in their own homes. From aerators to eco-friendly cartridges, our innovative water-saving features mean you can save water while not compromising on design.

## The European Water Label

The European Water Label empowers consumers with important information on the water and energy use of bathroom products.

With sustainability at our core, the vast majority of our products fall under the top water consumption band (Class A, using 5 litres or less of water).

## WRAS

WRAS (Water Regulations Advisory Scheme) has been approved as compliant with the Water Supply (Water Fittings) Regulations and Scottish Byelaws. All WRAS-approved products undergo rigorous mechanical and water quality testing that ensures the product will keep water supply clean and free from contamination.

To see the full list of our WRAS-approved products, please visit [vitra.co.uk/about-us/sustainability](https://vitra.co.uk/about-us/sustainability)

## Adjustable cartridges

Some of our mixers come with adjustable cartridges that limit the maximum heat and flow from the tap, which in turn can save up to 60% waste. Our water- and energy-saving products are marked throughout with these symbols.

 Water-saving

 Energy-saving

## Aerators

Aerators sit at the end of taps and add streams of air into the water flow. Water-saving and energy-saving, aerators significantly reduce the amount of water used while maintaining high water pressure. By directing water into one single downward flow, aerators also create a smoother flow and reduce splashing. Our ranges with aerators are marked throughout with the following symbols.

-  Water-saving aerator
-  Swivel aerator
-  Coin-slot aerator

Our water-saving aerators use significantly less water while maintaining a strong flow of 5 litres per minute.

Our swivel aerators allow you to change the direction of the water flow easily, meaning you can reach all areas of the washbasin.

Our coin-slot aerators can be effortlessly removed with the use of a coin, making it easy to clean the threaded aerator.

## Water pressures

Water pressure, measured in bars, describes the strength of water flow through a pipe. When choosing your bathroom brassware, it's important to understand the water pressure in your water plumbing system. Whether it's a gravity, combination boiler, pump-assisted or mains high pressure system (ask your installer if you're unsure), identifying your system is key to finding a product that will give the best possible performance.

The minimum water pressure requirements for each product (low, medium or high) are marked in the brochure. Most products will suit any water system, however, the high pressure products are designed to work with high pressure systems for maximum pressure. Equally, if you have low water pressure, there are lots of products that will work for you.

-  Low (0.4 bar)
-  Medium (0.4-1.0 bar)
-  High (above 1.0 bar)

We are committed to reducing the use of non-renewable resources in the production process.

# Blue Life

Evolution stems from being adaptable to change. As the climate and the needs of our clients change, our ethos as a company evolves. In 2017, we initiated Blue Life, our pledge to greener production.

Since the Blue Life initiative began, we are now using 35% less water than before and have reduced energy consumption in our ceramic kilns factory by 15%. But this is just the beginning of what we are striving for.

We are taking this initiative to our products. Our 2.5/4ltr WC pan has been engineered to use up to 60% less water per flush than a standard design and our brassware is manufactured with adjustable pins for you to have control over water usage.

By choosing a Vitra product, you are contributing to saving the world's natural resources.

## Our pledge to the future

- Continue the use of renewable resources in the production process.
- Develop products that promote power and resource conservation.
- Make significant investments towards boosting eco-efficiency.

## Guarantees

Furniture and mirrors	2 years	Wall-hung frames and concealed cisterns	5 years <sup>i</sup>
Sanitaryware	10 years		
Toilet seats	2 years	Acrylic baths	25 years
V-Care shower toilet	2 years	Bath panels	2 years
Aquacare bidet function	2 years	Brassware	10 years <sup>i</sup>
Flush plates (excluding infrared panels)	5 years	Shower systems	5 years <sup>ii</sup>
Infrared and electronic products	2 years	Accessories	5 years
		Complementary parts (waste set & waste cover)	5 years

If a product fails due to a manufacturing fault, Vitra will offer a free replacement or replacement parts. If a product is not available, Vitra will offer an alternative to the same value.

<sup>i</sup>Replacement only for working parts - non transferable.

<sup>ii</sup>2-year guarantee on Move shower system.

## Disclaimer

Vitra is a British registered trademark under no. 1515313.

Our policy is one of continuous product improvement and we reserve the right to alter product specification without notice. Vitra reserves the right to discontinue products in this brochure.

All prices shown are recommended retail prices inclusive of 20% VAT and are valid at time of printing.

Every effort has been made to make the colour, finishes and dimensions in this brochure as accurate as possible, however, we cannot guarantee an exact match.
