VitrA

Bathroom Collection – Edition 2

2022

A haven of relaxation. A sanctuary of calm and comfort.

Born in the world’s ceramic heartland, Vitra blends traditional Turkish craftsmanship and expertise with creativity and innovation. We design, develop and manufacture all our products, with no detail overlooked, collaborating with talented designers and engineers to shape the future of bathroom design and pioneer the latest technology and manufacturing processes.

We are committed to reducing non-renewable resources, not only during manufacture but also in product development, to ensure power and water conservation for every Vitra product. We call it Blue Life, see page 249 for more.

Characterised by inclusivity and innovation, you’ll find all the following attributes throughout our ranges: our ingenious app-controlled technology (page 28), our patented Rim-ex pans engineered for superior hygiene (page 22), Vitra Hygiene technology applied to every product (page 12), and even our efficient flush plates (page 24) that conserve every last drop of water.

From the timeless to the contemporary, for the cosiest of cloakrooms to the luxurious spa-inspired, we have a bathroom range to suit your style and space. Inspiration is just a page turn away.

Vitra London is our award winning flagship showroom in the Turnmill building in Clerkenwell. Explore the space and see the breadth of our designer ranges over two floors.

Your
space.

Your
style.

Setting the right mood

There are few spaces more essential or personal than your bathroom.

Techy or traditional? Subtle or stand-out? Do you have room to spread out or do you need to be layout-savvy?

Our award-winning bathrooms can offer refreshingly contemporary themes or familiar traditional style – whatever fits with your style, space and budget.

Need help? We've compiled mood boards of some of our favourite looks to kick-start your design journey.

Innovation, design and creativity drive product development.

At our Innovation Centre, leading architects, designers and engineers collaborate to bring new and exciting ideas to life, to push the boundaries of bathroom design via the development of new technologies and materials.

Touchless basin mixers

Our touchless basin mixers and accessories add another dimension of hygiene to the bathroom. Controlled by an infrared sensor this eliminates the need to touch the handle or lever. The taps are easy to use and extremely hygienic.

Smart technology in everyday products

Our latest generation V-Care shower toilets (page 16), combine the functionality of a toilet with the personal hygienic benefits of a bidet, fully customisable and remote-controlled to create the ultimate bathroom experience.

Alternatively, the Aquacare shower toilet (page 18) benefits from an integrated and mechanically operated bidet function, as well as complete ease of installation, while our unique Rim-ex rimless toilet design (page 22) promotes effortless hygiene and beautiful clean lines.

VitrA Clean

A surface finish that makes VitrA sanitaryware products incredibly easy to care for. This special glazing process increases surface tension so the water flows easily across the surface. All that's needed to keep the basins clean is a wipe with a damp cloth and the use of a mild detergent, making cleaning easier and helping to keep your bathroom looking its best. VitrA Clean finish is on a variety of basins including the Outline range.

VitrA Hygiene

A unique glazing process developed by VitrA that prevents germs multiplying. From washbasins to WCs, bidets to urinals, products produced with our VitrA Hygiene technology offer superior cleanliness throughout the product's lifetime. VitrA Hygiene is applied as standard to all ceramic products.

Greener living

We are committed to reducing non-renewable resources, not only during manufacture but also in product development, to ensure power and water conservation for every VitrA product.

The VitrA Smart Panel (page 28) syncs with your phone via a dedicated app, putting you in complete control of your water usage. Its latest sensor technology creates our most hygienic and efficient flush ever.

In addition, all our flush plates (page 24) release exactly the right quantity of water, helping you to monitor and conserve usage in one simple action.

Finally, our concealed cisterns (page 234) and wall-hung frames are the hidden partner in the design of your bathroom, allowing you to protect that other precious resource – your space.

For more information about our commitment to innovation and the environment, visit vitra.co.uk

Shower toilets

The health and hygiene benefits of washing with water after using the toilet are becoming better understood as people experience that just-showered feeling. Latest innovation and product developments have enabled the creation of a range of options but choosing a shower toilet that will meet your current and future needs can be daunting, so we have created this simple guide to help you through the process.

A shower toilet combines the functionality of a WC with the cleaning properties of a bidet all in one product – no need to find space for a bidet. Using a shower toilet is also kinder and gentler to you and there are also notable environmental benefits through the reduced reliance on toilet paper.

At Vitra, we offer a range of options depending on what kind of washing experience you want. Sophisticated multifunction shower-toilets offer wash, dry, and room deodorise features. Some have helpful additions such as sensor lighting which will light up the bathroom when anyone enters the room. At the entry level the Aquacare shower toilet offers just the simple convenience of washing with water.

Here are some key questions to consider to help navigate you through the choice of shower toilets:

So, what is a shower toilet in simple terms?

At its simplest a shower toilet is a standard toilet with the addition of a wash-with-water feature. They can also be referred to as bidet-toilets or washlets. As you move through the options you can choose additional features, one of the most important is to ensure the water is thermostatically controlled for maximum comfort and washing effectiveness.

So why do you need a shower toilet, when we have toilet paper?

Toilet paper is environmentally unfriendly, costly and has an unseen impact in our sewer systems. Toilet paper is not as effective at cleaning the body as water. Shower toilets significantly reduce the amount of toilet paper needed, which is better for the environment and for your pocket.

My bathroom is small – which unit is best suited to a small space?

The shower toilets from Vitra use the same amount of space as a standard WC.

Is a shower toilet environmentally friendly?

Did you know that a single roll of toilet paper uses **37** gallons of water to manufacture? Or that **27,000** trees are flushed down the drain every day? On average, toilet paper usage is reduced by **75%** when using a shower toilet. Some shower toilets, such as Vitra’s V-Care Comfort model, offer a completely paperless solution, thanks to the washing and drying features.

Will I need a power connection?

That depends.

No, if you choose from the Aquacare range these are purely mechanical not requiring any power connection, all you need is hot and cold-water feeds.

If you choose from the V-Care range given the additional features such as the heated seat you will need a power source. The work must be done by a Part P compliant electrician and meet all the regulations for bathroom electrical installations.

Are all shower toilets wall-hung?

No, Vitra offers both floor-standing and wall-hung options.

I have a limited budget which is the best shower toilet for me?

Vitra’s Aquacare is the perfect choice for those working to a tight budget. The unit includes washing with water but does not require an electrical connection. It can be installed just like a standard WC which offers savings on labour costs too.

Money is no object, which shower toilet is the most luxurious?

The streamlined V-Care Prime is the top of the range shower WC from Vitra. Features include oscillating and pulsating jet washing options, adjustable drying temperature, five-seat temperature options, automatic purification, remote operation, a stylish and reassuring light for night use, remote seat opening and closing and many more features besides.

V-Care Prime, Rim-ex, wall-hung WC pan, 54cm, hidden fixation, White £2,900 (7231B403-6216)

V-Care

Our latest generation of V-Care shower toilets combine smart technology with the personal hygiene benefits of a bidet.

There are three options to choose from, all featuring Rim-ex technology (see page 24):

V-Care Prime

The Prime model raises the standard in terms of features and for the ultimate convenience there is a wall-hung option and a floor-standing version perfect for a retrofit solution. The stylish design complements any bathroom style and the sensor light provides ambient light within the bathroom, perfect for night time visits to the bathroom. There is a full range of cleaning options, including a gentle front cleaning function for women. Heated seat, variable wash settings and drying options are included for the ultimate personalised washing experience.

V-Care Comfort

The mid-range option, with the female and male wash function is perfect for families. Auto open and close seat is included as well as variable washing and drying options. Air deodorising is also included.

V-Care Essential

Entry level option but still with plenty of features to meet the cleaning needs of most people. If you don't want the drying option this is the choice for you.

All the V-Care WCs are controlled using a stylish remote control and Vitra Prime can also be used using the app, so the wash experience can be pre programmed.

Below is an easy to use comparison table:

	V-Care Prime	V-Care Comfort	V-Care Essential

Aquacare shower toilet

Developed by the Vitra Design and Innovation Team, Aquacare is a bidet and toilet in one, offering a refreshing, clean and hygienic bathroom experience. No electrical connections are required as the water is controlled via standard plumbing methods.

The Integra, Sento and M-Line Aquacare toilets feature soft-closing seats and our hygienic Rim-ex design (see page 22), and can also be used with the Vitrus cistern (see page 238).

When installing an Aquacare WC there is no additional equipment or preparation required for installation.

There is also a choice of WC shape to ensure it will blend with any bathroom design. The mixer tap can either be wall-mounted or integrated into the WC design for the ultimate in choice and flexibility.

A user-friendly mechanical bidet function

Available with an integrated or wall-mounted mixer valve.

Increased hygiene

Aquacare WCs feature a non-return valve providing an air break to prevent contaminated water from the pan travelling back through the system. Fully compatible with the EN1717 regulation which protects against the pollution of drinking water.

Beautifully designed

The Aquacare technology is hidden within the pan so it looks like a regular toilet and will integrate with any bathroom design. A soft-close seat is included with all models. Rim-ex technology is also included as standard making the toilet more hygienic and easier to clean.

Thermostatic control

The M-Line and Sento Aquacare toilets offer a thermostatic feature to ensure a consistent water temperature, to a maximum of 38° temperature. This is controlled via a mixer valve mounted on the side of the toilet.

Features and benefits

- Styles available:
 - Sento Aquacare
 - M-Line Aquacare
 - Integra Aquacare
 - Choice of controller location; either wall-mounted or integrated into the WC design (except Integra).
- Wall-hung
- Rim-ex toilet design
- Soft-close seat
- Simple to install

Quick and easy to install

Aquacare comes as a complete set. Included is a toilet with a pre-assembled and integrated air breaker and a soft-closing seat. No additional equipment or preparations besides water installation are required.

If maintenance is required, access is easy. One simple click removes the Aquacare cover located below the toilet seat.

Rim-ex

Rim-ex harnesses the latest in toilet bowl design. With a rimless, smooth internal pan that eliminates anywhere for germs and dirt to accumulate, the toilet that stays cleaner for longer and actively resists dirt build up.

Tests prove Rim-ex is 95% more hygienic than standard toilet pans* and it is much easier to clean – as there are no ledges you have complete visibility of the bowl. The unique design of the pan incorporates a water diverter to direct the flush around the bowl, which is easily removed for cleaning.

*Tests undertaken by the Akdeniz University, Turkey, show Vitra Rim-ex toilet pans are easier to clean and 95% more hygienic compared to standard toilet pans.

Smart Panel

Using the latest digital sensor technology we've created the most hygienic and efficient toilet flush available.

As the digital home evolves, Vitra has combined smart technology with water-saving design in a modern and elegant flush plate that is compatible with Vitra 742 and 748 frames.

V-Care Smart Panel app

The Smart Panel system can be synced to the owner's mobile phone through Vitra's app, allowing the user to flush and view usage data for their toilet remotely. The app's regular reporting allows households to see their weekly water usage and identify how they can be more efficient.

Flush with success

Vitra's Smart Panel has three flushing options – a full flush, half flush and a periodic flush – allowing the user to have control over water usage. Designed with hygiene in mind, the new periodic flush mode can be set to regularly wash out the bowl, minimising the risk of dirt and stains accumulating, keeping waste pipes clean.

Family-friendly features

For families, the smart flush plate can be locked as a safety precaution for children.

Smart Panel electronic flush plate*
For 742 regular frames **£662 – 742-1501**
For 748 slim frames **£734 – 748-1501**
H: 159mm W: 238mm P: 12mm

Smart Panel app
(compatible with iOS and Android devices)

Monitor usage data and remotely operate your Smart Panel

*Must be used in conjunction with our electronic mechanism installation set (which must be installed during wall application) **£85 – 300-1028**

Shift

The bold structures of Shift are balanced by its subtle curved edges, resulting in an elegant bathroom range.

Highly adaptable, Shift allows for a greater degree of flexibility in the design of your space - it would work with a variety of tap ranges, wastes and accessories.

NEW

Root

The new Root Collection is based on a simple design idea that allows you to create your ideal bathroom.

The collection, created with every detail in mind, offers a variety of size and style options to fit any bathroom. With an array of colours to choose from you can personalise your furniture with additional handle and leg options.

A smart and easy combination

The Root collection comes in three different design options for a personalised bathroom experience.

Root Groove offers a contemporary bathroom design with matt colour options and stylish door detail.

Root Classic provides a wonderful alternative for those looking for a classic, traditional style, reminiscent of the timeless Shaker design.

Root Flat offers a sophisticated option for those who appreciate a minimalist design with its simple, modest lines.

Groove

Classic

Flat

My bathroom, my choice

Root furniture is a complete bathroom solution offering washbasin units, side units, tall storage units in three designs and taps in two complementary designs; round and square.

With storage dividers and bottom drawers designed to store tall cleaning supplies or bathroom products, the intelligent design of Root makes your life even easier. Available in standard and short projection, Root furniture can be used in even the smallest of bathrooms. Design your dream bathroom by using the step by step guide below.

Step 1

Choose a style and a colour

Groove

Classic

Flat

- Matt White
- Matt Light Grey
- Matt Grey
- Matt Fjord Green
- Matt Graphite
- Matt Dark Blue
- Matt Retro Green

- Matt White
- Matt Light Grey

A classic look

Root Classic offers a contemporary twist on a classic design, available in a selection of matt colour finish options with Matt Black handles as standard.

The shaker style drawers have been designed to bring sophistication into your bathroom space, whilst remaining timeless throughout different bathroom trends.

Available in seven different colours including Matt White, Matt Light Grey, Matt Grey, Matt Fjord Green, Matt Graphite, Matt Dark Blue and Matt Retro Green. Which can be paired with either Chrome, Matt Black or Matt White handles.

Rich colours

Root Flat offers three different finishes: high gloss, matt and natural wood.

The High Gloss White, High Gloss Pearl Grey, High Gloss Anthracite and High Gloss Sahara Beige colours add a shine to the bathroom with their smooth gloss finish.

The Rock Grey, Storm Grey and Dark Blue colours have a matt finish and work perfectly for creating a modern looking bathroom. Contrasted with natural wood on the inside of the drawers, these finishes create a warming balance.

Natural Oak, Walnut and Cordoba colour options are available for those who want the warm and calming effect of wood in their bathrooms. It provides a stylish and natural contrast to the anthracite colour wood inside the drawers of the washbasin units.

Root flat has Chrome bar handles as standard but can be changed to Matt Black or Matt White.

Complementary washbasins

The Root collection offers three different basin styles to complement the three different furniture styles.

Integra has a deep basin with useful flat edges. Integra Classic has a short upstand at the back, creating a more traditional look and Zentrum basins have a more geometrical outer but a rounded internal basin shape.

Fresh thinking

Always mindful of good hygiene, our easy-clean Rim-ex pans and back-to-wall designs eliminate the gaps where dust and dirt can gather.

See page 22 for more details about our Rim-ex innovation.

50cm, 1TH **£129 – 5460L003-0999**
H: 185mm W: 500mm P: 430mm 

Put it on a pedestal

Pedestals give your basin extra
stability and hide unsightly
plumbing. If floor space is
limited, half pedestals provide
an equally elegant answer.

Bathtubs

Bring the promise of calm and serenity with a stunning bath. Available in a whole host of sizes and made from the highest standard acrylic.

All baths are paired with a leg set, featuring a minimum of five adjustable feet and come with a fully encapsulated wooden baseboard and frame. Also included is an advanced wall fixing kit to keep everything secured, ensuring stability with no creaking or bowing.

All baths carry a 25-year guarantee, with panels covered for two years.

Balance

Fantastic water-saving baths available in three popular sizes to fit most bathrooms. Featuring a slightly shallower depth with a generous angled recline, less water is needed to fill the bath. This not only saves water and therefore money, but thanks to its economical design, is much better for the environment.

All Balance
baths are compatible
with a leg set **£65**

Water Regulations Advisory Scheme
Promoting sustainability, preventing contamination

Shower systems

Refresh and revitalise your bathroom with our range of stylish showers. Choose from a wide range of designs with thermostatic or manual (non thermostatic) options.

If you're not sure where to start, we've created a helpful guide on page 196, or for extra convenience we have brought together all the elements you need in five unique designs on page 218.

Choosing your shower system	196
V-Box built-in shower mixers	200
Minibox built-in shower mixers	202
Flow diverters	204
Bath spouts	205
Hand showers	206
Showerheads and connection pipes	208
Aquaheat shower packs	210
Aquaheat shower mixers	214
Shower columns	215
Move shower column	216
Complete thermostatic shower solutions	218

Choosing your shower system

Choosing the right shower system is one of the most important aspects of your bathroom. However, we know it can be overwhelming with so many aspects to consider. To keep things simple, we have created this step-by-step guide.

Step 1

Decide between a built-in or wall-mounted shower mixer, depending on the type of wall you have (cavity or solid)

Cavity wall

For a cavity wall you can choose between a built-in or a wall-mounted shower mixer. Built-in shower mixers create a minimalist look, opening up more space under the showerhead. Built-in shower mixers must be used with a concealed shower valve, either V-Box (see page 200), Minibox (see page 202) or Aquaheat (see page 214).

Solid wall

For a solid wall, the common solution is a wall-mounted shower mixer for its versatility, ease of fit and range of different styles. See from page 200 for our wall-mounted shower mixer options.

Step 2

Choose your showerhead and/or hand shower

We have a wide range of stylish and practical showerheads and hand showers to match our bath, shower and basin mixers. From traditional to modern, round to square, powerful to water-saving, you can find one that perfectly matches the other elements of your bathroom design. See pages 206-208 for our showerhead and hand shower options.

Step 3

Adding a bath to your bathroom equation?

You'll need a diverter to enable the flow of water to be switched from one outlet to another, such as the showerhead to the bath. Our range of diverters come in styles and finishes that match our mixers to give you a complete look. These are shown on page 204.

Shower sprays

From kick-starting your day to winding down at its end, we've got the perfect shower experience to match your mood. Below are a number of different spray options, from soft and gentle to strong and energising.

Aqua-soft

Aqua-massage

Aqua-massage + Aqua-soft

Aqua-spray

Type of shower mixer

The mixer controls the flow of water, similar to the tap on a basin.

Manual shower mixers

Our manual showers allow you to adjust both the temperature and flow rate allowing a high level of temperature control through the valve.

Thermostatic shower mixers

Our thermostatic showers allow you to enjoy a shower at the precise temperature you want, whilst ensuring it is sustained throughout your shower. Carefully mixing the hot and cold water supply, the thermostatic shower mixer recognises changes to water pressure or temperature, so if a tap is used, a bath run or toilet flushed elsewhere in your home, your shower will remain at your chosen temperature.

Why a thermostatic shower?

- Perfect for busy households, the consistency in temperature prevents the risk of sudden and unsafe water temperature changes
- Water and energy consumption is reduced with the sustained temperature, lowering your bills
- You can find the exact water temperature that gives you the most relaxing and enjoyable shower experience, and return to this temperature every time you shower
- With our 38° safety buttons, the water will never exceed this temperature unless the button is pressed – ideal for those with young children.

 Our thermostatic showers are marked with the above symbol.

Built-in thermostatic shower mixers

V-Box concealed thermostatic shower valve

V-Box offers complete flexibility to fit any bathroom design. It enables three water outlets (bath, hand shower and/or showerhead) and can be used with a range of square or round thermostatic built-in mixers. For 3-way showers (bath spout, hand shower and showerhead), select a 1-way thermostatic shower mixer and 3-way diverter – see page 204 for our diverters. V-Box can be trimmed to fit a 77mm wall depth which is standard in the UK and is compatible with our thermostatic shower mixers listed below.

Aquaheat shower packs

Our Aquaheat shower packs provide the ultimate in convenience; all the necessary components to create the perfect showering experience are packaged in a simple box.

Every Aquaheat shower is thermostatic and includes a showerhead and hand shower. The hand shower also incorporates a water-saving button to control the flow of water to minimise water consumption or to change the shower spray experience.

Some of the Aquaheat showers include the ‘cool touch’ feature which prevents the shower mixer from becoming too hot to touch, particularly important for children and vulnerable people. Look out for the ‘cool touch’ symbol.

Vitrus

The Vitrus glass cistern and frame is a unique solution to update your bathroom without having to create a false wall to hide your toilet cistern.

Available in your choice of Black or White, with chrome sides, Vitrus is easy to install and is designed with a large cover opening for easy maintenance and is compatible with all VitrA wall-hung and back-to-wall toilets, including Aquacare.

Frames for wall-hung WCs

VitrA's frame systems are crucial to any modern bathroom, supporting and holding wall-hung WCs firmly in place without the need for expensive structural building work.

Whatever your project needs, VitrA's range of frames offers you complete flexibility. The reduced height frame is perfect when space is at a premium or the room has a sloping roof or low window. Both the slim and regular-sized frames can be used in solid, stud and double-stud wall scenarios and are both available with a choice of flushing volumes.

For technical specifications on all products, please visit vitra.co.uk

*Check against our full range of wall-hung frames for WCs, urinals, bidets and washbasins at vitra.co.uk

Need an alternative to a wall-hung frame? Our Vitrus glass concealed cisterns (page 238) for wall-hung and back-to-wall WCs can be used with any wall type, removing the need to create a false wall to hide the frame.

Strength and stability guaranteed

VitrA's wall-hung frames
are subjected to rigorous
reliability and performance
testing at VitrA's production
facilities.

For optimal performance it is recommended wall-hung Rim-ex pans are used with a full height frame and at 3/6 litre flushing setting
For optimal performance it is recommended that reduced-height frames are used with standard, non Rim-ex, wall-hung WC pans

For horizontal drainage connection for all wall-hung frames & cisterns, please order **436448YP** and **437274YP**

Sustainability and accreditations

We're driven by our commitment to a sustainable future and the efficient use of water is one of our top priorities. We recognise our responsibility as a leading manufacturer of bathroom products to spearhead the water-saving movement having achieved the target set of reducing our own water consumption by 4% between 2017 and 2020.

We are also devoted to developing products and technologies that enable our customers to save water in their own homes. From aerators to eco-friendly cartridges, our innovative water-saving features mean you can save water while not compromising on design.

The European Water Label

The European Water Label empowers consumers with important information on the water and energy use of bathroom products.

With sustainability at our core, the vast majority of our products fall under the top water consumption band (Class A, using 5 litres or less of water).

WRAS

WRAS (Water Regulations Advisory Scheme) has been approved as compliant with the Water Supply (Water Fittings) Regulations and Scottish Byelaws. All WRAS-approved products undergo rigorous mechanical and water quality testing that ensures the product will keep water supply clean and free from contamination.

To see the full list of our WRAS-approved products, please visit [vitra.co.uk/about-us/sustainability](https://www.vitra.co.uk/about-us/sustainability)

Adjustable cartridges

Some of our mixers come with adjustable cartridges that limit the maximum heat and flow from the tap, which in turn can save up to 60% waste. Our water- and energy-saving products are marked throughout with these symbols.

Water-saving

Energy-saving

Aerators

Aerators sit at the end of taps and add streams of air into the water flow. Water-saving and energy-saving, aerators significantly reduce the amount of water used while maintaining high water pressure. By directing water into one single downward flow, aerators also create a smoother flow and reduce splashing. Our ranges with aerators are marked throughout with the following symbols.

Water-saving aerator

Swivel aerator

Coin-slot aerator

Our water-saving aerators use significantly less water while maintaining a strong flow of 5 litres per minute.

Our swivel aerators allow you to change the direction of the water flow easily, meaning you can reach all areas of the washbasin.

Our coin-slot aerators can be effortlessly removed with the use of a coin, making it easy to clean the threaded aerator.

Water pressures

Water pressure, measured in bars, describes the strength of water flow through a pipe. When choosing your bathroom brassware, it's important to understand the water pressure in your water plumbing system. Whether it's a gravity, combination boiler, pump-assisted or mains high pressure system (ask your installer if you're unsure), identifying your system is key to finding a product that will give the best possible performance.

The minimum water pressure requirements for each product (low, medium or high) are marked in the brochure. Most products will suit any water system, however, the high pressure products are designed to work with high pressure systems for maximum pressure. Equally, if you have low water pressure, there are lots of products that will work for you.

Low (0.4 bar)

Medium (0.4-1.0 bar)

High (above 1.0 bar)

We are committed to reducing the use of non-renewable resources in the production process.

Blue Life

Evolution stems from being adaptable to change. As the climate and the needs of our clients change, our ethos as a company evolves. In 2017, we initiated Blue Life, our pledge to greener production.

Since the Blue Life initiative began, we are now using 35% less water than before and have reduced energy consumption in our ceramic kilns factory by 15%. But this is just the beginning of what we are striving for.

We are taking this initiative to our products. Our 2.5/4ltr WC pan has been engineered to use up to 60% less water per flush than a standard design and our brassware is manufactured with adjustable pins for you to have control over water usage.

By choosing a Vitra product, you are contributing to saving the world's natural resources.

Our pledge to the future

- Continue the use of renewable resources in the production process.
- Develop products that promote power and resource conservation.
- Make significant investments towards boosting eco-efficiency.

Guarantees

Furniture and mirrors	2 years	Wall-hung frames and concealed cisterns	5 years [†]
Sanitaryware	10 years	Acrylic baths	25 years
